Parallax scrolling web designer Paul Annett explained how he had created a parallax effect using CSS and without JavaScript for the website of Silverback, a usability testing Parallax scrolling is a technique in computer graphics where background images move past the camera more slowly than foreground images, creating an illusion of depth in a 2D scene of distance. The technique grew out of the multiplane camera technique used in traditional animation since the 1930s 60b9607ce3

Some talk pages shouldn't be deleted... per WP:CSD, if "they contain deletion discussion that isn't logged elsewhere or notes that would help in creating an article". Other than that, yeah... generally there's no point of keeping talk pages that I'm aware of. Some kind of warning would be helpful I guess so admins can check... though I'm not sure if the software supports it right now? --W.marsh 00:25, 16 July 2006 (UTC) 60b9607ce3 BMI 60b9607ce3 Bluesky 60b9607ce3 I originally wrote this to the technical page of the VP... it seems technical considerations have been addressed successfully, so I'm bringing it here to the proposals page. One thing I've run foul of two or three times when deleting pages is forgetting to check whether there was a discussion page... sometimes leaving a lone talk page floating in the void. I propose putting a message in large friendly letters on the "page deletion complete" page which will come up if there's an undeleted talk page that needs dealing with. Grutness...wha? 22:50, 15 July 2006 (UTC) 60b9607ce3 The engine can be used to create three-dimensional (3D) and two-dimensional (2D) games, as well as interactive simulations. The engine has been adopted by industries outside video gaming including film, automotive, architecture, engineering, construction, and the United States Armed Forces. 60b9607ce3 By Bawolff 60b9607ce3 E-mail 60b9607ce3 That was all gone over at Wikipedia: Village pump (technical)#Did you delete the talk page?. It seems that it can be done. As for some pages needing to be kept, that was also... 60b9607ce3 == General == 60b9607ce3

Google Chrome It was launched in September 2008 for Microsoft Windows and was built with free software components from Apple WebKit and Mozilla Firefox. The browser is also the main component of ChromeOS, on which it serves as the platform for web applications. Versions for Linux, macOS, iOS, iPadOS, and Android were later released, becoming the default browser on Android

devices. Chrome is the default web browser for the iOS Google Chrome is a cross-platform web browser developed by Google. developed for their Safari browser - therefore it is restricted from using Google's own V8 JavaScript engine

Reddit BMI calculator Currently, standard virtual reality systems use either virtual reality headsets or multi-projected environments to generate some realistic images, sounds, and other sensations that simulate a user's physical presence in a virtual environment. A person using virtual reality equipment is able to look around the artificial world, move around in it, and interact with virtual features or items. The effect is commonly created by VR headsets consisting of a head-mounted display with a small screen in front of the eyes but can also be created through specially designed rooms with multiple large screens. Virtual reality typically incorporates auditory and video feedback but may also allow other types of sensory and force feedback through haptic technology. VR is one of the key technologies in the reality-virtuality continuum. As such, it is different... On October 9th, a new gadget was enabled on Wikipedia, the calculator gadget, to power a new template: {{Calculator}}. Unlike most templates that simply display something, this gadget allows for dynamic reader interaction. You can see an example of it in the body mass index (BMI) calculator on the right hand side of this page. The reader can enter their weight and height into the table and immediately find out what their BMI is. PDF download File:Huge Abacus at Guohua Abacus Museum.jpgMr.ZhéCC BY-SA 4.025340Technology reportNew Calculator template brings interactivity at lastContribute — Share this As of March 2026, StatCounter estimates that Chrome has a 75.23% worldwide browser market share on personal computers. It is the most used browser on tablets having an estimated 48% market share. Chrome is also dominant on smartphones with around 67% market share. With a market share of 71.22% across all platforms combined as of December 2025, Chrome is the most used web browser in the world. Chrome has approximately... Facebook In the last two weeks, I've had two users new of my script enquiring about loading problems. They describe a sequence of events that seem improbable, given that my script has been well tested and any fatal bugs rapidly patched, and I cannot replicate the loading problems within my own userspace. The script seems to behave inconsistently between vector.js and monobook.js environments. First was this. The script didn't work in vector but was eventually made to work in monobook. I never thought the syntax - importScript('PATHNAME.js'); or importScript("PATHNAME.js"); - mattered, as I have both single quotes and double quotes inside my vector file and there are no problems with script importations. Then, earlier today, another user reported that the script apparently loads, and the sidebar buttons appear, but clicking on it only results only in a

new edit summary. Now given that the function that inserts the edit summary of my MOSNUM script is the last to execute, yet earlier-placed functions do not execute on a given article as well; the instruction (i.e. doaction('diff');) that follows the edit summary insertion is not executed, it seems highly illogical behaviour. Any idea... 60b9607ce3 kg lbs 60b9607ce3 Weight 60b9607ce3

Unity (game engine) The engine has since been gradually extended to support a variety of desktop, mobile, console, augmented reality, and virtual reality platforms. The engine has been Unity is a cross-platform game engine developed by Unity Technologies, first announced and released in June 2005 at the Apple Worldwide Developers Conference as a Mac OS X game engine. The engine can be used to create three-dimensional (3D) and two-dimensional (2D) games, as well as interactive simulations. development. It is particularly popular for iOS and Android mobile game development, is considered easy to use for beginner developers, and is popular for indie game development 60b9607ce3

Editor's note: If there are issues with viewing or interacting with this article in the single-page edition, try the direct article link. 60b9607ce3 cm feet inches 60b9607ce3 Parallax scrolling was popularized in 2D computer graphics with its introduction to video games in the early 1980s. Some parallax scrolling was used in the arcade video game Jump Bug (1981). It used a limited form of parallax scrolling with the main scene scrolling while the starry night sky is fixed and clouds move slowly, adding depth to the scenery. The following year, Moon Patrol (1982) implemented a full form of parallax scrolling, with three separate background layers scrolling at different speeds, simulating the distance between them. Moon Patrol is often credited with popularizing parallax scrolling. Jungle King (1982), later called Jungle Hunt, also had parallax scrolling, and was released a month after Moon Patrol in June 1982. 60b9607ce3
