

Iec 61850 Communication Solutions For Simatic Siemens

The operator interfaces, which enable monitoring and the issuing of process commands, such as controller setpoint changes, are handled through the SCADA computer system. The subordinated operations, e.g. the real-time control logic or controller calculations, are performed by networked modules connected to the field sensors and actuators. 71f239d90f

SCADA widely adopted and used. These communication protocols are standardized and recognized by SCADA (an acronym for supervisory control and data acquisition) is a control system architecture comprising computers, networked data communications and graphical user interfaces for high-level supervision of machines and processes. Standard protocols are IEC 60870-5-101 or 104, IEC 61850 and DNP3. It also covers sensors and other devices, such as programmable logic controllers, also known as a distributed control system (DCS), which interface with process plant or machinery 71f239d90f

The SCADA concept was developed to be a universal... 71f239d90f
