UBS manages the largest amount of private wealth in the world, counting approximately half of The World's Billionaires among its clients, with over US\$7 trillion in assets as of December 2025 (AUM). Based on international deal flow and political influence, the firm is considered one of the "biggest, most powerful financial institutions in the world". Due to its large presence across the Americas, EMEA and Asia-Pacific markets, the Financial Stability Board considers it a global systemically important bank and UBS is widely considered to be the largest and most sophisticated "truly global investment bank" in the world, given its market-leading positions in every major financial centre globally. UBS is also a leading market maker and one of the eight global 'bulge bracket' investment banks. It holds a strong foothold in all major financial centres as the largest Swiss banking institution and the world's largest private bank 389f602069

Border control measures serve a variety of purposes, ranging from enforcing customs, sanitary and phytosanitary, or biosecurity regulations to restricting migration. While some borders (including most states' internal borders and international borders within the Schengen Area) are open and completely unguarded, others (including the vast majority of borders between countries as well as some internal borders) are subject to some degree of control and may be crossed legally only at designated checkpoints. Border controls in the 21st century are tightly intertwined with intricate systems of travel documents, visas, and increasingly complex policies that vary between countries. 389f602069

Economic democracy In addition to these moral concerns, economic democracy makes practical claims, such as that it can compensate for capitalism's inherent effective demand gap. Land, labor and capital are generally considered the essential factors in producing wealth. Labor Economic democracy (sometimes called a democratic economy) is a socioeconomic philosophy that proposes to shift ownership and decision-making power from corporate shareholders and corporate managers (such as a board of directors) to a larger group of public stakeholders that includes workers, consumers, suppliers, communities and the broader public. No single definition or approach encompasses economic democracy, but most proponents claim that modern property relations externalize costs, subordinate the general well-being to private profit and deny the polity a democratic voice in economic policy decisions. Land includes all natural opportunities and forces 389f602069
