Some predecessors to the modern clock may be considered "clocks" that are based on movement in nature: A sundial shows the time by displaying the position of a shadow on a flat surface. There is a range of duration timers, a well-known example being the hourglass. Water clocks, along with sundials, are possibly the oldest time-measuring instruments. A major advance occurred with the invention of the verge escapement, which made possible the first mechanical clocks around... 3b2b991e99 The understanding of risk, the methods of assessment and management, the descriptions of risk and even the definitions of risk differ in different practice areas (business, economics, environment, finance, information technology, health, insurance, safety, security,

privacy, etc). This article provides links to more detailed articles on these areas. The...
3b2b991e99 Most, if not all, cultures have attached importance to what they observed in the sky, and some—such as the Hindus, Chinese, and the Maya—developed elaborate systems for predicting terrestrial events from celestial observations. Western astrology, one of the oldest astrological systems still in use, can...

Bear Common characteristics of modern bears include large bodies with stocky legs, long snouts, small rounded ears, shaggy hair, plantigrade paws with five nonretractile claws, and short tails. original on 2013-07-22. Although only eight species of bears are extant, they are widespread, appearing in a wide variety of habitats throughout most of the Northern Hemisphere and partially in the Southern Hemisphere. ; Thompson, Debbie; Bears are carnivoran mammals of

the family Ursidae (). Ward & Kynaston 1995, p. ; Christian, Amelia L. ; Vineyard, Travis G. 130 Robbins, Charles T. They are classified as caniforms, or doglike carnivorans. Bears are found on the continents of North America, South America, and Eurasia. Retrieved 2017-01-11 3b2b991e99

While the polar bear is mostly carnivorous, and the giant panda is mostly herbivorous, the remaining six species are omnivorous with varying diets. With the exception of courting individuals and mothers with their young, bears... 3b2b991e99 Archives are generally grouped by month of Main Page appearance. (Currently, DYK hooks are archived according to the date and time that they were taken off the Main Page.) To find which archive contains the fact that appeared on Did you know, go to the article's talk page and follow the archive link in the DYK talk page message box or the Article Milestones box.

Clock Electronic circuits A clock or chronometer is a device that

measures and displays time. counting the cycles of the AC supply, vibration of a tuning fork, the behaviour of quartz crystals, or the quantum vibrations of atoms. Devices operating on several physical processes have been used over the millennia. The clock is one of the oldest human inventions, meeting the need to measure intervals of time shorter than the natural units such as the day, the lunar month, and the year 3b2b991e99

Astrology Harvard University Press
(Loeb Astrology is a range of divinatory practices, recognized as pseudoscientific since the 18th century, that propose that information about human affairs and terrestrial events may be discerned by studying the apparent positions of celestial objects.).
AFA. 20. , ed.

ISBN 978-0-86690-463-6. Ptolemy Tetrabiblos. 11–13. Barton 1994, p. pp. (1940). Different cultures have employed forms of astrology since at least the 2nd millennium

BCE, these practices having originated in calendrical systems used to predict seasonal shifts and to interpret celestial cycles as signs of divine communications.

Social science It now encompasses a wide array of additional academic disciplines, including anthropology, archaeology, economics, geography, history, linguistics, management, communication studies, psychology, culturology, and political science. The term was formerly used to refer to the field of sociology, the original "science of society", established in the 18th century. Management science Marketing Media studies Military science Organizational behavior Organizational studies Paralegal studies Penology Philosophy Political Social science (often rendered in the plural as the social sciences) is one of the branches of science, devoted to the study of societies and the

relationships among members within
those societies 3b2b991e99

Born in Barnet, Griffin was educated at Woodbridge School in Suffolk. He joined the National Front at the age of 14 and, following his graduation from the University of Cambridge, became a political worker for the party. In 1980 he became a member of its governing body, and later wrote articles for several right-wing magazines. He was the National Front's candidate for the seat of Croydon North West in 1981 and 1983, but left the party in 1989. In... 3b2b991e99 The predictions are influenced by many factors including the alignment of the Sun and Moon, the phase and amplitude of the tide (pattern of tides in the deep ocean), the amphidromic systems of the oceans, and the shape of the coastline and near-shore bathymetry (see Timing). They are however only predictions, and the actual time and height of the tide is affected by wind and atmospheric pressure. Many

shorelines experience semi-diurnal
tides—two nearly equal high and...

Risk the unauthorized use, loss, damage, disclosure or modification of organizational assets for the profit In simple terms, risk is the possibility of something bad happening. One international standard definition of risk is the "effect of uncertainty on objectives". in the compromise of organizational assets i. e. Many different definitions have been proposed. Risk involves uncertainty about the effects/implications of an activity with respect to something that humans value (such as health, well-being, wealth, property or the environment), often focusing on negative, undesirable consequences 3b2b991e99

Tide tables can be used for any given locale to find the predicted

times and amplitude (or "tidal range"). 3b2b991e99

Hunting This can be argued Hunting is the human practice of seeking, pursuing, capturing, and killing wildlife or feral animals. The most common reasons for humans to hunt are to obtain the animal's body for meat and useful animal products (fur/hide, bone/tusks, horn/antler, etc. g.), for recreation/taxidermy (see trophy hunting), although it may also be done for resourceful reasons such as removing predators dangerous to humans or domestic animals (e. has nevertheless often been assumed that at least occasional hunting behaviour may have been present well before the emergence of Homo. wolf hunting), to eliminate pests and nuisance animals that damage crops/livestock/poultry or spread diseases (see varminting), for trade/tourism (see safari), or for ecological conservation against overpopulation and invasive species (commonly called a cull) 3b2b991e99
