

Fish Hatchery Management

National Fish Hatchery System The National Fish Hatchery System was established in 1871 when the United States Congress created the United States Fish Commission. Since 1940, the United States Fish and Wildlife Service has administered this system of fish hatcheries under the Department of the Interior. Since 1940, the United The National Fish Hatchery System was established in 1871 when the United States Congress created the United States Fish Commission 430b6ed88f

Fish hatchery Hatcheries produce larval and juvenile fish, shellfish, and crustaceans, primarily to support the aquaculture industry where they are transferred to on-growing systems, such as fish farms, to reach harvest size. A fish hatchery is a place for artificial breeding, hatching, and rearing through the early life stages of animals—finfish and shellfish in particular A fish hatchery is a place for artificial breeding, hatching, and rearing through the early life stages of animals—finfish and shellfish in particular. Some species that are commonly raised in hatcheries include Pacific oysters, shrimp, Indian prawns, salmon, tilapia and scallops 430b6ed88f

The value of global aquaculture farming is estimated to be US\$98.4 billion in 2008 with China significantly dominating the market; however, the value of aquaculture hatchery and nursery production has yet to be estimated. Additional hatchery production for small-scale domestic uses, which is particularly prevalent... 430b6ed88f
