Wikipedia:Language learning centre/Word list Eventually these
words will all be translated into big lists in many different
languages and using the words in phrase contexts as a resource.

compositions compositor compositors compost Drawing up a
comprehensive list of words in English is important as a reference
when learning a language as it will show the equivalent words you
need to learn in the other language to achieve fluency. A big list
will constantly show you what words you don't know and what you
need to work on and is useful for testing yourself. You can use the
list to generate your own lists in whatever language you're
learning and to test yourself 2f4bc7fb12

List of Korean inventions and discoveries In the contemporary era, South Korea plays an active role in the ongoing Digital Revolution, with one of the largest electronics industries and most innovative economies in the world. Trends of Urban Planning in Korea Based on Pervasive and Ubiquitous Geotechnology and Geoinformation". In particular, the country has played a role in the modern Digital Revolution through its large electronics industry with a number of modern revolutionary and widespread technologies in fields such as electronics and robotics introduced by Korean engineers, entrepreneurs, inventors, and scientists. Computational Science and Its Applications – ICCSA This is a list of Korean inventions and discoveries; Koreans have made contributions to science and technology from ancient to modern times. The Koreans have made contributions across a number of scientific and technological domains 2f4bc7fb12

Wikipedia:Database reports/Long short descriptions short description used in this report is customizable. It currently lists articles with short descriptions of more than 93 characters. Edit the page and change the number at the end of the line that reads AND LENGTH(pp_value) > If This is a report of articles with the longest short descriptions. The longest descriptions are at the top; note that because some characters are more than one ASCII unit in length, the count given by a word-processing program, which is the length that actually matters when displaying the SD, may be shorter than the length given by the report 2f4bc7fb12

"Computational complexity theory", 2f4bc7fb12 Evolution is a feature of biological systems for over 3.8 billion years according to observed life appearance estimations. It has evolved species with high performance using commonly found materials. Surfaces of solids interact with other surfaces and the environment and derive the properties of materials. Biological materials are highly organized from the molecular to the nano-, micro-, and macroscales, often in a hierarchical... 2f4bc7fb12

Biomimetics plants was developed for inflatable lightweight structures such as rubber boats or Tensairity constructions. The terms "biomimetics" and "biomimicry" are derived from Ancient Greek: βίος (bios), life, and μίμησις (mīmēsis), imitation, from μιμεῖσθαι (mīmēisthai), to imitate, from μῖμος (mimos), actor. The researchers applied a thin soft cellular Biomimetics or biomimicry is the emulation of the models, systems, and elements of nature for the purpose of solving complex human problems. A closely related field is bionics 2f4bc7fb12
