Futures contract The item transacted is usually a commodity or financial instrument. Futures contracts are widely used for hedging price risk and for speculative trading in commodities, currencies, and financial instruments. Similarly In finance, a futures contract (sometimes called futures) is a standardized legal contract to buy or sell something at a predetermined price for delivery at a specified time in the future, between parties not yet known to each other. The specified time in the future when delivery and payment occur is known as the delivery date. The predetermined price of the contract is known as the forward price or delivery price. farmers often sell futures contracts for the crops and livestock they produce to guarantee a certain price, making it easier for them to plan. Because it derives its value from the value of the underlying asset, a futures contract is a derivative 9bbfce70b4
