List of datasets for machine-learning research High-quality labeled training datasets for supervised and semi-supervised machine learning algorithms are usually difficult and expensive to produce because of the large amount of time needed to label the data. Datasets are an integral part of the field of machine learning. Major advances in this field can result from advances in learning algorithms (such as deep learning), computer hardware, and, less-intuitively, the availability of high-quality training datasets. Major advances in this field can result from advances in learning algorithms (such as deep learning), computer hardware, and, less-intuitively, the availability These datasets are used in machine learning (ML) research and have been cited in peer-reviewed academic journals. Although they do not need to be labeled, high-quality datasets for unsupervised learning can also be difficult and costly to produce 2196b40365
