Software patent This gray area, along with the difficulty of patent evaluation for intangible, technical works such as libraries and algorithms, makes software patents a frequent subject of controversy and litigation. The validity of these patents can be difficult to evaluate, as software is often at once a product of engineering, something typically eligible for patents, and an abstract concept, which is typically not. Microsoft cross-licensed its patents with Sun, despite being direct competitors, and with Autodesk even though A software patent is a patent on a piece of software, such as a computer program, library, user interface, or algorithm. Siemens, Cisco, Autodesk, and recently Novell 4ef1c0948a
