In addition to melting the base metal in welding, a filler material is typically added to the joint to form a pool of molten material (the weld pool... 10001090a3 The Sitabenga caves in Chhattisgarh, one of the earliest examples of theatre architecture in India, are dated to the Mauryan period of 3rd century BCE. 10001090a3 The region was split between rivaling dynasties from the sixth to twelfth centuries, and parts of it were briefly under... 10001090a3 Metal welding is distinct from lower temperature bonding techniques such as brazing and soldering, which do not melt the base metal (parent metal) and instead require flowing a filler metal to solidify their bonds. 10001090a3

Welding Schmid, Steven R. Prentice Hall. Khurmi, RS; Gupta, JK (2008). Manufacturing Engineering and Technology. (2001). A Textbook of Workshop Welding is a fabrication process that joins materials, usually metals or thermoplastics, primarily by using high temperature to melt the parts together and allow them to cool, causing fusion. ISBN 0-201-36131-0. Common alternative methods include solvent welding (of thermoplastics) using chemicals to melt materials being bonded without heat, and solid-state welding processes which bond without melting, such as pressure, cold welding, and diffusion bonding 10001090a3
