

Red Dust Road

Most soils in Australia have no cohesive structure and their surface often contains medium to high amounts of fine sand. Because of the lack of cohesion when compressed or disturbed, bulldust will form. These disturbances can be anything that breaks up the track surface, such as a car or vehicle driving along a road, or a pack of animals such as camels running through the desert. Once the road surface has been disturbed, the bulldust particles released into the air can remain suspended for up to several minutes. The dust will then resettle on the road surface, vegetation, and passing cars or vehicles. This can occur in dry areas such as the Outback, arid Australia, or when there has been an extended dry season in a normally damper area.

The novel is widely regarded as an American classic, regularly on college syllabi for American literature. The book is a roman à clef, much of it rooted in autobiographical incidents in Fante's life. The novel influenced Charles Bukowski significantly. In 2006, screenwriter Robert Towne adapted the novel into a film, *Ask the Dust*, starring Salma Hayek and Colin Farrell.

While the cloud was visible from space, on the ground the intense red-orange colour and drop in temperature drew comparisons with nuclear winter, Armageddon, and the planet Mars.
