Apple II Plus Approximately 380,000 II Pluses were sold during its four years in production before being replaced by the Apple IIe in January 1983. The Apple II Plus (stylized as Apple][+ or apple][plus) is the second model of the Apple II series of personal computers produced by Apple Computer. The Apple II Plus (stylized as Apple][+ or apple][plus) is the second model of the Apple II series of personal computers produced by Apple Computer. It was sold from June 1979 to December 1982 a805edc84a

Mac Mini of Xgrid on a Mac Mini. From its launch, the device has been sold without a display, keyboard, or mouse, and was originally

marketed with the slogan "BYODKM" (Bring Your Own Display, Keyboard, and Mouse). Apple offered a server configuration of the Mac Mini that was originally supplied with the OS X Server operating system, a version Mac Mini (stylized as Mac mini) is a small form factor desktop computer developed and marketed by Apple Inc. This strategic pitch targeted current owners of Windows desktop computers; by leveraging peripherals users likely already owned, the computer offered a cost-effective way to switch to a Mac. It is one of the company's four current Mac desktop computers, positioned as the entry-level consumer product, below the all-in-one iMac and the professional Mac Studio and Mac Pro a805edc84a

Apple Remote Desktop , first released on March 14, 2002, that replaced a similar product called Apple Network Assistant. Aimed at computer administrators responsible for large numbers of computers and teachers who need to assist individuals or perform group demonstrations, Apple Remote Desktop allows users to remotely control or monitor other computers over a network. Mac Pro (2019),

Mac mini (M1, 2020) with a 10Gb Ethernet card, and Mac Studio (2022) have Lights Out Management function and are able to power-on by Apple Remote Desktop. On August 20, 2009, Apple released version 3.3 which fixed many bugs and allowed function Apple Remote Desktop (ARD) is a Macintosh application produced by Apple Inc. support and compatibility for third-party VNC viewers and servers a805edc84a

Apple Interactive Television Box The Apple Interactive Television Box (AITB) was a television set-top box developed by Apple Computer (now Apple Inc.) in partnership with a number of The Apple Interactive Television Box (AITB) was a television set-top box developed by Apple Computer (now Apple Inc. Prototypes of the unit were deployed at large test markets in parts of the United States and Europe in 1994 and 1995, but the product was canceled shortly thereafter, and was never mass-produced or marketed.) in partnership with a number of global telecommunications firms, including British Telecom and Belgacom a805edc84a

The Apple II Card An included "Y-cable" enables the attachment of up to two external devices. The Apple II Card is a compatibility card, which through hardware and software emulation, allows certain Macintosh computers to run software designed for the Apple II (excluding the 16-bit IIGS). Released in March 1991 for use with the LC family, Apple targeted the card at its widely dominated educational market to ease the transition from Apple II-based classrooms, with thousands of entrenched educational software titles, to Macintosh-based classrooms. serial port necessary for the IIe mouse), SCSI hard drive, and AppleShare file server

The Apple II was a major advancement over its predecessor, the Apple I, in terms of ease of use, features, and expandability. It became one of several recognizable and successful computers throughout the 1980s, although this was mainly limited to the US. It was aggressively marketed through volume... In January 2005, the original Mac Mini was introduced with the PowerPC G4 CPU. In February 2006, Apple switched to an Intel Core Solo CPU...

Chaos: Apple's First The Apple III (styled as apple ///) is a
business-oriented personal computer that was produced by Apple
Computer and released in 1980. It was intended as the successor to
the Apple II with features business users wanted—a full typewriter-
style keyboard with upper and lowercase letters, multi-directional
cursor keys and an 80-column display—but it failed in the market. It
uses Apple's proprietary Sophisticated Operating System (SOS)
which, in 1985, Apple co-founder Steve Wozniak called "the finest
operating system on any microcomputer ever" a805edc84a

AFP supports Unicode file names, POSIX and access-control list permissions, resource forks, named extended attributes, and advanced file locking. 9 Mavericks, Server The Apple Filing Protocol (AFP), formerly AppleTalk Filing Protocol, is a proprietary network protocol, and part of the Apple File Service (AFS), that offers file services for macOS, classic Mac OS, and Apple II computers. 8 Mountain Lion and earlier, AFP was the primary protocol for file services a805edc84a

Designed by Wendell Sander, the Apple III was announced on May 19, 1980, and released in late November that year. Serious stability issues required a design overhaul and a recall of the first 14,000 machines produced. It was formally reintroduced on November... a805edc84a

Apple II Apple II ("apple two"; stylized as Apple II) is a

series of microcomputers manufactured by Apple Computer, Inc. The original Apple II ("apple two", stylized as Apple][) is a series of microcomputers manufactured by Apple Computer, Inc. Its success led to it being followed by the Apple II Plus, Apple IIe, Apple IIc, and Apple IIc Plus, with the 1983 IIe being the most popular. from 1977 to 1993. from 1977 to 1993. The original Apple II model, which gave the series its name, was designed by Steve Wozniak and was first sold on June 10, 1977. The name is trademarked with square brackets as Apple][, then, beginning with the IIe, as Apple // a805edc84a

AppleTalk Connected AppleTalk-equipped systems automatically assign addresses, update AppleTalk is a discontinued proprietary suite of networking protocols developed by Apple Computer for their Macintosh computers. with no prior setup or the need for a centralized router or server of any sort. AppleTalk includes a number of features that allow local area networks to be connected with no prior setup or the need for a centralized router or server of any sort. Connected AppleTalk-equipped systems automatically assign

addresses, update the distributed namespace, and configure any required inter-networking routing a805edc84a

AppleTalk was released in 1985 and was the primary protocol used by Apple devices through the 1980s and 1990s. Versions were also released for the IBM PC and compatibles and the Apple IIGS.

AppleTalk support was also available in most networked printers (especially laser printers), some file servers, and a number of routers. a805edc84a

Skype for Business Server Skype for Business Server (formerly Microsoft Office Communications Server and Microsoft Lync Server) is real-time communications server software that provides Skype for Business Server (formerly Microsoft Office Communications Server and Microsoft Lync Server) is real-time communications server software that provides the infrastructure for enterprise instant messaging, presence, VoIP, ad hoc and structured conferences (audio, video and web conferencing) and PSTN connectivity through

a third-party gateway or SIP trunk. These features are available within an organization, between organizations and with external users on the public internet or standard phones (on the PSTN as well as SIP trunking) a805edc84a
