When introduced, the range flagship, the 220 Turbo Coupé, was the most powerful and fastest production Rover model ever built.

Production began in 1949 with the 6-cylinder 2.1-litre Rover 75. Four years later a 2-litre 4-cylinder Rover 60 was brought to the market to fit below the 75 and a 2.6-litre 6-cylinder Rover 90 to top the three-car range. Several variations followed.

Furthermore, due to post-war steel shortage, and aluminium surplus, Land Rovers received non-rusting aluminium alloy bodies, favouring their longevity. Contrary to conventional car and truck chassis, it used a sturdier fully box-welded frame

The SD1 was the final Rover-badged vehicle to be produced at Solihull.

Future Rover models would be built at the former British Motor Corporation factories at Longbridge and Cowley. In "SD1", the "SD" refers to "Specialist Division" and "1" is the first car to come from the in-house design team.
