Adolescence Proctor, R. 42–45 Adolescence (from Latin adolescere 'to mature') is a transitional stage of human physical and psychological development that generally occurs during the period from puberty to adulthood (typically corresponding to the age of majority). Physical growth (particularly in males) and cognitive development can extend past the teens. Some definitions start as early as 10 and end as late as 30. (2012). , & Winder, C. "Interplay: The Process of Interpersonal Communication, Third Canadian Edition" Oxford University Press. Age provides only a rough marker of adolescence, and scholars have not agreed upon a precise definition. The World Health Organization definition officially designates adolescence as the phase. F. Adolescence is usually associated with the teenage years, but its physical, psychological or cultural expressions may begin earlier or end later. Puberty typically begins during preadolescence, particularly in females. pp fd53833c26

Psychology extend to interpersonal relationships, psychological resilience, family resilience, and other areas within social psychology. Biological psychologists seek an understanding of the emergent properties of brains, linking the discipline to neuroscience. Psychology is an academic discipline of immense scope, crossing the boundaries between the natural and social sciences. Its subject matter includes the behavior of humans and nonhumans, both conscious and unconscious phenomena, and mental processes such as thoughts, feelings, and motives. They also consider the unconscious Psychology is the scientific study of mind and behavior. As social scientists, psychologists aim to understand the behavior of individuals and groups fd53833c26

48 fd53833c26 141 fd53833c26 Aristotle defined rhetoric as "the faculty of observing in any given case the available means of persuasion", and since mastery of the art was necessary for victory in a case at law, for passage of proposals in the assembly, or for fame as a speaker in civic ceremonies, he called it "a combination of the science of logic and of the ethical branch of politics". Aristotle also identified... fd53833c26 94 fd53833c26 112 fd53833c26

Child abuse Child abuse may include any act or failure to act by a parent or a caregiver that results in actual or potential wrongful harm to a child and can occur in a child's home, or in organizations, schools, or communities the child interacts with. Journal of Interpersonal Violence. 15 (5): Child abuse (also called child endangerment or child maltreatment) is physical, sexual, emotional and/or psychological maltreatment or neglect of a child, especially by a parent or a caregiver. Revictimization in the Form of Adult Sexual Abuse, Adult Physical Abuse, and Adult Psychological Maltreatment" fd53833c26

Lobbying in the United States hard to tell if a lobbyist did actual work; that much of what happens regarding interpersonal relations is obscure despite rather strict disclosure and Lobbying in the United States is paid activity in which special interest groups hire well-connected professional advocates, often lawyers, to argue for specific legislation in decision-making bodies such as the United States Congress. It is often perceived negatively by journalists and the American public; critics consider it to be a form of bribery, influence peddling, or extortion and lobbying was illegal in the United States in the eighteenth and much of the nineteenth centuries. Constitution. Lobbying has been interpreted by court rulings as free speech protected by the First Amendment to the U. S. Lobbying is subject to complex rules which, if not followed, can lead to penalties including jail. Since the 1970s, the numbers of lobbyists and the size of lobbying budgets has grown and become fd53833c26

Occupational therapy Occupational therapy is based on the assumption that engaging in meaningful activities, also referred to as occupations, is a basic human need and that purposeful activity has a health-promoting and therapeutic effect. Occupational science, the study of humans as 'doers' or 'occupational beings', was developed by inter-disciplinary scholars, including occupational therapists, in the 1980s.

Ergotherapy is derived from the Greek ergon which is allied to work, to act and to be active. include interpersonal neurobiology (IPNB), polyvagal theory (PVT), and the dynamic-maturational model of attachment and adaptation (DMM). The latter two Occupational therapy (OT), also known as ergotherapy, is a healthcare profession fd53833c26

Rhetoric Burke focused on the interplay of identification and division, maintaining that identification Rhetoric is the art of persuasion. tactics of identification found in an immense range of sources[specify]. As an academic discipline within the humanities, rhetoric aims to study the techniques that speakers or writers use to inform, persuade, and motivate their audiences. It is one of the three ancient arts of discourse (trivium) along with grammar and logic/dialectic. Rhetoric also provides heuristics for understanding, discovering, and developing arguments for particular situations fd53833c26

This theory contrasts with objectivist epistemologies, particularly in rejecting the notion that empirical facts alone define reality... fd53833c26 69 fd53833c26 39 fd53833c26 25 fd53833c26 157 fd53833c26 61 fd53833c26 95 fd53833c26

Developmental psychology This field examines change across three major dimensions, which are physical development, cognitive development, and social emotional development. interpersonal progress. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Within these three dimensions are a broad range of topics including motor skills, executive functions, moral understanding, language acquisition, social change, personality, emotional development, self-concept, and identity formation. The developmental stages in Indian models are founded by Hinduism, which primarily teaches stages of life in the process of someone Developmental psychology is the scientific study of how and why humans grow, change, and adapt across the course of their lives fd53833c26
