Row counter (hand knitting) Design variations A row counter for hand knitting is a tally counter for counting rows or courses worked, for

counting stitch pattern repetitions, or for counting increases or decreases of the number of stitches in consecutive rows. Design variations include on-needle barrel-shaped counters for straight-needle work, stitch-marker counters for knitting on double-pointed and circular needles, complex counters which attempted to assist with decreases, increases and lacework, stand-alone hand-held counters in imitation of the hand-tally, pendant counters worn round the neck and online software for iPhones. The first commercially produced one appeared on the market in the 1920s after the general public started regularly knitting from unfamiliar printed and complex patterns. appeared on the market in the 1920s after the general public started regularly knitting from unfamiliar printed and complex patterns ec9b6ab108

Sock environments, warm socks help people avoid getting cold feet, which in turn helps decrease the risk of getting frostbite. Until the 1800s, both hand-made and machine-knit socks were manufactured, with the latter technique becoming more common in the 19th century, and continuing until the modern day. In ancient times, socks were made from leather or matted animal hair. Thin socks are most commonly A sock is a piece of clothing worn on the feet and often covering the ankle or some part of the calf. Some types of shoes or boots are typically worn over socks. == Biography == ec9b6ab108 One of the roles of socks is absorbing perspiration. The foot is among the heaviest producers of sweat in the body: it can produce over 0.25 US pints (0.12 L) of perspiration per day. Socks help to absorb this sweat and draw it to areas where air can evaporate the perspiration. They also protect shoes, a more expensive, durable, and frequently reworn foot covering, from perspiration, extending their life. ec9b6ab108

Hand knitting needles are either straight and cylindrical or in the round with plastic tubes or wire (cables) joining the ends of both. Knitted fabric consists of a number of consecutive rows of connected loops that intermesh with the next and previous rows. As each row is formed, each newly created loop is pulled through one or more loops from the prior row and placed on the 'gaining needle' (the needle that is receiving newly created stitches) so that the loops from the prior row can be pulled off the other needle without unraveling. ec9b6ab108 He died of heart trouble in 1903.
