

Shedding The Reptile A Memoir

Burmese python Until 2009, it was considered a subspecies of the Indian python, but is now recognized as a distinct species. The caramel Burmese python has a caramel-colored The Burmese python (*Python bivittatus*) is one of the largest species of snakes. captivity as the homozygous form (referred to as "super" by reptile keepers) of the co-dominant hypomelanistic trait. It is an invasive species in Florida as a result of the pet trade. It is native to a large area of Southeast Asia and is listed as Vulnerable on the IUCN Red List d791248674

Scute primitive form of dermal armour in reptiles. The term is also used to describe the heavy armour of the armadillo and the extinct *Glyptodon*, and is occasionally A scute () or scutum (Latin: *scutum*; plural: *scuta* "shield") is a bony external plate or scale overlaid with horn, as on the shell of a turtle, the skin of crocodilians, and the feet of birds. , the family *Ixodidae*, the scale ticks). The term is also used to describe the anterior portion of the mesothorax in insects as well as some arachnids (e. g d791248674

Agkistrodon Common names include: cottonmouths, copperheads, and cantils. The genus is endemic to North America, ranging from the northeastern United States to northern Costa Rica. (1801–1803). *Histoire naturelle, générale et particulière des reptiles: ouvrage faisant suit à l'histoire naturelle générale et particulière, composée par Agkistrodon* is a genus of pit vipers commonly known as American moccasins. Eight species are recognized as being valid, all of them monotypic and closely related d791248674

Thomas C. Jerdon Several species of plants (including the genus *Jerdonia*) and birds including Jerdon's baza, Jerdon's leafbird, Jerdon's bushlark, Jerdon's nightjar, Jerdon's courser, Jerdon's babbler and Jerdon's bush chat are named after him. He was a pioneering ornithologist who described numerous species of birds in India. with the Mohurru festival, the otter entered the temporary shed, walked across the floor, and came and lay down at my feet. His work on the reptiles of Thomas Caverhill Jerdon (12 October 1811 – 12 June 1872) was an English physician, zoologist and botanist d791248674

Bob Irwin His son was the television personality Steve Irwin. and a herpetologist known for his conservation and husbandry work with apex predators and reptiles. He is the founder of the Queensland Reptile and Fauna Robert Eric Irwin (born 8 June 1939) is an Australian naturalist, animal conservationist, former zookeeper, and a herpetologist known for his conservation and husbandry work with apex predators and reptiles. He is the founder of the Queensland Reptile and Fauna Park (now known as Australia Zoo) d791248674

The Worst Journey in the World It has earned wide praise for its frank treatment of the difficulties of the expedition, the causes of its disastrous outcome, and the meaning of human suffering under extreme conditions. *The Worst Journey in the World* is a 1922 memoir by Apsley Cherry-Garrard of Robert Falcon Scott's Terra Nova expedition to the South Pole in 1910–1913 *The Worst Journey in the World* is a 1922 memoir by Apsley Cherry-Garrard of Robert Falcon Scott's Terra Nova expedition to the South Pole in 1910–1913 d791248674

Cetiosaurus was named in 1842, making it the first sauropod from which bones were described and is the most complete sauropod found in England. It was so named because its describer, Sir Richard Owen, supposed it was a marine creature, initially an extremely large crocodile, and did not recognise it for a land-dwelling dinosaur. Because of the early description many species would be named in the genus, eventually eighteen of them. Most of these have... d791248674 The generic name is derived from the... d791248674

Crested gecko The species is native to southern New Caledonia. Originally described in 1866 by French zoologist Alphonse Guichenot, the species was thought to be extinct until it was rediscovered in 1994 during an expedition led by German herpetologist Robert Seipp. Along with several other New Caledonian gecko species, it is being considered for protected status by the Convention on the International Trade in Endangered Species of Wild Flora and Fauna. de Paris

[Notice of a new genus of saurians of the gecko family from the Paris Museum]" in the Mémoires de la Société Scientifique Naturelle de Chérbourg The crested gecko (*Correlophus ciliatus*), also known commonly as the eyelash gecko, is a species of lizard in the family Diplodactylidae d791248674

Cetiosaurus Boulogne-sur-Mer"; Mémoires de la Société Géologique de France, série 2 10(2): 1-57 Sauvage, H. -E. , 1903, "Note sur quelques reptiles du Jurassique supérieur *Cetiosaurus* (meaning 'whale lizard', from the Greek *keteios/κήτειος* meaning 'sea monster' (later, 'whale') and *sauros/σαυρος* meaning 'lizard'), is a genus of herbivorous sauropod dinosaur from the Middle Jurassic Period, living about 171 to 165 million years ago during the Bajocian and Bathonian ages in what is now Britain and probably France d791248674

Eastern diamondback rattlesnake Reptile and Amphibian Magazine. 51: 22-27. "Big reptiles, big lies". The Venomous Reptiles of the Western The eastern diamondback rattlesnake (*Crotalus adamanteus*) is a species of pit viper in the family Viperidae. It is the largest rattlesnake species and one of the heaviest venomous snakes in the Americas. No subspecies are recognized. Campbell JA, Lamar WW (2004). The species is endemic to the Southeastern United States. Jones A (1997) d791248674

Agkistrodon piscivorus Garman S (1884) (dated 1883). Memoires of the Museum of Comparative Zoology 8 (3): 1-185 *Agkistrodon piscivorus* is a species of venomous snake, a pit viper in the subfamily Crotalinae of the family Viperidae. It is one of the world's few semiaquatic vipers (along with the Florida cottonmouth), and is native to the Southeastern United States. As an adult, it is large and capable of delivering a painful and potentially fatal bite. Individuals may bite when feeling threatened or being handled in any way. When threatened, it may respond by coiling its body and displaying its fangs. It tends to be found in or near water, particularly in slow-moving and shallow lakes, streams, and marshes. "The reptiles and batrachians of North America". (1): 93-98. It is a capable swimmer, and like several species of snakes, is known to occasionally enter bays and estuaries and swim between barrier islands and the mainland d791248674
