120 30e28f7d34 Autism is a neurodevelopmental disorder characterized by differences in reciprocal social
interaction and communication as well as restricted, repetitive interests, behaviors, or activities. There are
effective psychosocial and pharmacological treatments for associated problems with social interaction, executive
function, and restricted or repetitive behaviour. Treatment is typically catered to the person's needs. Treatments
fall into two major categories: educational interventions and medical management. Training and support are also
given to families of those diagnosed... 30e28f7d34 Talk:(R,R)-Tetrahydrochrysene 30e28f7d34 Though originally

Personality disorder Official criteria for diagnosing personality disorders are listed in the sixth chapter of the International Classification of Diseases (ICD) and in the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM). These patterns develop early, are inflexible, and are associated with significant distress or disability. Common medications include antidepressants (for mood-related symptoms), anxiolytics Personality disorders (PD) are a class of mental health conditions characterized by enduring maladaptive patterns of behavior, cognition, and inner experience, exhibited across many contexts and deviating from those accepted by the culture. co-occurring symptoms, such as anxiety, depression, or impulsivity. The definitions vary by source and remain a matter of controversy 30e28f7d34
