“Multimeter”,

Submarine (It differs from a submersible, which has more limited underwater capability. considerably aided by the Imperial Japanese Navy's failure to provide adequate escort forces for the nation's merchant fleet.) The term "submarine" is also sometimes used historically or informally to refer to remotely operated vehicles and robots, or to medium-sized or smaller vessels (such as the midget submarine and the wet sub). During World War II, 314 submarines A submarine (often shortened to sub) is a watercraft capable of independent operation underwater. Submarines are referred to as boats rather than ships regardless of their size

“Electronic component”, Although experimental submarines had been built earlier, submarine design took off during the 19th century, and submarines were adopted by several navies. They were first used widely during World War I (1914–1918), and are now used in many navies, large and small. Their military uses include: attacking enemy surface ships (merchant and... “Ceramic capacitor”,

You can use the list to generate your own

lists in whatever language you're learning and to test yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself 03fa40fab5
