White only gets a writing credit because it samples a song he wrote in the 1970s. 290f0edc11 I think that is it generally agreed that WP:MEDRS has been a success in keeping frivolous and questionable medical assertions out of the encyclopedia. As an attorney approaching two decades in practice, I can not tell you how many times I have seen mainstream media outlets reporting on legal matters from what I would call a Hollywood understanding of how the law works, rather than a practical legal understanding. This extends to understanding the burdens (or absence of burdens) for filing a civil claim or a criminal charge, the legal insignificance of "dramatic" witness testimony, and the importance of technicalities on which cases sometimes hinge. There needs to be an extra level of vetting for legal reporting to ensure that the sources used to support legal claims are not only reliable sources in terms of their editorial policies, but are also competent in their comprehension of the law. In the narrow sense, an acronym is a sequence of letters (representing the initial letters of words in a phrase) when pronounced together as a single word, like NASA, NATO, or laser. In the broad sense, the term includes this kind of sequence when pronounced letter by letter (such as GDP or USA). Sources that differentiate the two often call the former acronyms and the latter initialisms or alphabetisms. However, acronym is popularly used to refer to either concept, and both senses of the term are attributed as far back as the 1940s. Dictionary and style-guide editors dispute whether the term acronym

can be legitimately applied to abbreviations which are not pronounced as words, and there is no general agreement on standard acronym spacing, casing, and punctuation. 290f0edc11 - The Stooges 290f0edc11 - Jimi Hendrix 290f0edc11 It's a Wrap[edit] 290f0edc11 The article was promoted by Ian Rose via FACBot (talk) 31 May 2023 [1]. 290f0edc11 Comments by ChrisTheDude[edit] 290f0edc11 The term CALI (computer-assisted language instruction) was used before CALL, originating as a subset of the broader term CAI (computer-assisted instruction).
