Engineering technologist An education in engineering technology concentrates more on application and less on theory than does an engineering education. An engineering technologist is a professional trained in certain aspects of development and implementation of a respective area of technology. Like engineers, areas where engineering technologists can work include product design, fabrication, and testing. Engineering technologists sometimes rise to senior management positions in industry or become entrepreneurs. Engineering technologists often assist engineers; but after years of experience, they can also become engineers.
