See Category:Language articles with manual ELP links. These are sometimes necessary when different WP's define the scope of a language name differently (e.g. Australian names that sources disagree as to whether they're dialects or distinct languages; the WP-fr article, say, might define it as only the named lect, while we include others said to likely be the same language), so that putting the entire scope of the WP-en article into Wikidata would cause problems with other WP's. Also, people from other WP's 'correcting' the scope of Wikidata to match their articles would then corrupt the coverage of WP-en.
