Many Romance linguists consider it, together with Italian, as the language that is the closest to Latin among all of Latin's descendants. However, it has also incorporated elements of Pre-Latin (mostly Paleo-Sardinian and, to a much lesser degree, Punic) substratum, as well as a Byzantine Greek, Catalan, Spanish, French, and Italian superstratum. These elements originate in the political history of Sardinia, whose indigenous society experienced competition and, at times, conflict with a series of

colonizing newcomers. 1d923fba0c == Supporting parties ==
