Communication The main field of inquiry investigating communication is called communication studies. Models

of communication are simplified overviews of its main components and their interactions. The message is sent through a channel to a receiver who has to decode it to understand it. Its precise definition is disputed and there are disagreements about whether unintentional or failed transmissions are included and whether communication not only transmits meaning but also creates it, as well as sign language. Non-verbal communication happens without the use of a linguistic system, for example, using body language, touch, and facial expression. Communication is commonly defined as the transmission of information. Many models include the idea that a source uses a coding system to express information in the form of a message
