Causes of autism ASD (autism spectrum disorder) is a neurodevelopmental disorder marked by impairments in communicative ability and social interaction, as well as restricted and repetitive behaviors, interests, or activities not suitable for the individual's developmental stage. The severity of symptoms and functional impairment vary between individuals. autism may prove similar to diseases such as sickle cell anemia, that demonstrate balanced polymorphism. Attempts have been made to incorporate the known genetic and environmental causes into a comprehensive causative framework. A 2011 study proposed the "Solitary Forager Hypothesis" Many causes of autism, including environmental and genetic factors, have been recognized or proposed, but understanding of the etiology of autism is incomplete 637b49d973

Wikipedia:Language learning centre/Word list You can use the list to generate your own lists in whatever language you're learning and to test yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. sickbed sicken sickened sickening sickeningly sickens sicker sickest sickle sickles sickliest sickly sickness sicknesses sickroom side sideband sidebands Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself 637b49d973
