Military Revolution These changes in turn had major political consequences in the level. Charles VIII's invasion of Italy in 1494 demonstrated the potency of siege artillery; but in this region by the early The Military Revolution is the theory that a series of radical changes in military strategy and

tactics during the 16th and 17th centuries resulted in major lasting changes in governments and society. Roberts linked military technology with larger historical consequences, arguing that innovations in tactics, drill and doctrine by the Dutch and Swedes (1560–1660), which maximized the utility of firearms, led to a need for more trained troops and thus for permanent forces (standing armies). Armies grew much larger and more expensive. The theory was introduced by Michael Roberts in the 1950s as he focused on Sweden (1560–1660) searching for major changes in the European way of war caused by the introduction of portable firearms. art of fortification, and vice versa d326f0b480

The term arquebus was applied to many different forms of firearms from the 15th to 17th centuries, but it originally referred to "a hand-gun with a hook-like projection or lug on its under surface, useful for steadying it against battlements or other objects when firing". These "hook guns" were in their earliest forms defensive weapons mounted on German city walls in the early 15th century. The addition of a shoulder stock, priming pan, and matchlock mechanism in the late 15th century turned the arquebus into a handheld firearm and also the first firearm equipped with a trigger. d326f0b480
