Occupational licensing Some claim higher public support[citation needed] for the licensing of professions whose activities could be a health or safety Occupational licensing, also called licensure, is a form of government regulation requiring a license to pursue a particular profession or vocation for compensation. It is related to occupational closure. related to occupational closure e711f14a78

Some claim higher public support for the licensing of professions whose activities could be a health or safety threat to the public, such as practicing medicine, and doctors require occupational licenses in most developed countries. However, some jurisdictions also require licenses for a much wider range of professions, such as florists and hairdressers. Some studies find consumers are more responsive to reviews than to occupational licensing status. e711f14a78

Occupational therapist OTs have training in the physical, psychological, and social aspects of human functioning deriving from an education grounded in anatomical and physiological concepts, and psychological perspectives. Occupational therapists (OTs) are health care professionals specializing in occupational therapy and occupational science. They enable individuals across the lifespan by optimizing their abilities to perform activities that are meaningful to them ("occupations"). OTs and occupational therapy assistants (OTAs) use scientific bases and a holistic perspective to promote a person's ability to fulfill their daily routines and roles. OTs and occupational therapy Occupational therapists (OTs) are health care professionals specializing in occupational therapy and occupational science. Human occupations include activities of daily living, work/vocation, play, education, leisure, rest and sleep, and social participation e711f14a78
