It has a "head" that, at any point in the machine's operation, is positioned over one of these cells, and a "state" selected from a finite set of states. At each step of its operation, the head reads the symbol in its cell. Then, based on the symbol and the machine's own present state, the machine writes a symbol into the same cell, and moves the head one step to... 08440aec1f

Program synthesis SRI International. In contrast to program verification, the program is to be constructed rather than given; however, both fields make use of formal proof techniques, and both comprise approaches of different degrees of automation. Archived (PDF) from In computer science, program synthesis is the task to construct a program that provably satisfies a given high-level formal specification. In contrast to automatic programming

techniques, specifications in program synthesis are usually non-algorithmic statements in an appropriate logical calculus. A Deductive Approach to Program Synthesis (PDF) (Technical Note). Zohar Manna and Richard Waldinger (Dec 1978) 08440aec1f

The primary application of program synthesis is to relieve the programmer of the burden of writing correct, efficient code that satisfies a specification. However, program synthesis also has applications to superoptimization and inference of loop invariants. 08440aec1f Manna (29 April – 7 May 1945), air-dropped 7,000 tonnes of food into the Nazi-occupied western part of the Netherlands. Honeydew (secretion) When their mouthpart penetrates the phloem, the sugary, high-pressure liquid is forced out of the anus of the insects, allowing them to rapidly process the large volume of sap required to extract essential nutrients present at low concentrations. Ants may collect, or "milk", honeydew directly from aphids and other honeydew Honeydew is a sugar-rich sticky liquid that is secreted by aphids, some scale insects, many other true bugs, and some other insects as they feed on plant sap. bleed after the insects have moved on, leaving a white sugar crust called manna. Some caterpillars of Lycaenidae butterflies and some moths also produce honeydew. In addition to various sugars, honeydew contains small amounts of amino acids, other organic compounds, and inorganic salts, with its precise makeup affected by factors such as insect species, host plant. Honeydew is particularly common as a secretion in hemipteran insects and is often the basis for trophobiosis 08440aec1f
