Honda K engine Additional notes K24A2 (2006–2008 Acura TSX) Increased The Honda K-series engine is a line of four-cylinder four-stroke car engines introduced in 2001. 4500 rpm in performance mode. The cylinders have cast iron sleeves similar to the B- and F-series engines, as opposed to the FRM cylinders found in the H- and newer F-series engines found only in the Honda S2000. The K-series engines are equipped with DOHC valvetrains and use roller rockers on the cylinder head to reduce friction. Sportshift: 7300 rpm Manual: 7600 rpm 2400 rpm While in fuel efficiency mode. The engines use a coil-on-plug, distributorless ignition system with a coil for each spark plug. This system forgoes the use of a conventional distributor-based ignition timing system in favor of a computer-controlled system that allows the ECU to control ignition timings based on various sensor inputs c59d256ac7
