

Javascript Absolute Beginner S Guide

Also, is anyone aware of a list that sorts Category:Wikipedia articles needing rewrite based upon page views? I'm hoping to help a classroom (or classrooms, eventually) identify some targets for editing. Thanks. Biosthmors (talk) 19:36, 4 March 2013 (UTC) 35de6405c0 AppleScript is tightly bound to the Mac environment, similar to how Windows Script Host is bound to the Windows environment. In other words, AppleScript is not a general purpose scripting language like Python. One way that AppleScript is bound to the unique aspects of its environment is that it relies on applications to publish dictionaries of addressable objects and operations. 35de6405c0 Same here; the "Dismiss" button, which was always previously present, is now AWOL. - The Bushranger One ping only 21:54, 7 November 2013 (UTC) 35de6405c0 As is typical of a command language, AppleScript is not designed to directly perform intensive processing. Wikipedia:Village pump (technical)/Archive 109 2013 (UTC) A vast number of beginners don't understand that the red "script error" is a link, and indeed, with Javascript disabled it isn't. But it is == weirdness == 35de6405c0

I am seeing this as well. The notice needs a "dismiss" link added. Who needs to be asked to fix it? - Jonesey95 (talk) 22:54, 7 November 2013 (UTC) 35de6405c0 I have a brand new PC. Twice over the last two weeks, the power has shut off unexpectedly. I'm going to take it in because it's still under warranty, but I'd like get an idea of what may be happening so I don't sound like a complete doofus when I'm explaining the problem. I'll just be surfing the net or whatever and the main power shuts off: hard-drive stops spinning, fans stop, LED on the power button shuts off, etc. However, the little green LED where the ethernet plugs in is still on, as is one of the other little LEDs inside the tower. I'm barely an amateur when it comes to PC hardware, but my guess is that there's something wrong with the power supply and that some, but not all, of the power cords that feed the various devices are getting cut off. Turning off the switch at the back/unplugging and replugging the external power cord seem to fix the situation and 'puter is back up and running again in a few minutes. Sound familiar? Anything else I should note before placing the call? Matt Deres (talk) 00:00, 27 October 2009 (UTC) 35de6405c0 AppleScript is primarily a mechanism for driving Apple events - an inter-application communication (IAC) technology that exchanges data between and controls applications. Additionally, AppleScript supports basic calculations and text processing, and is extensible via scripting additions that add functions to the language. 35de6405c0 Is there a tool to identify short, "low-quality", and highly-viewed articles? Limits for quality might include a certain number of cleanup templates, {{multiple issues}}, or Category:Wikipedia articles needing rewrite. 35de6405c0

A new notice has appeared at the top of my watchlist advertising three different discussions about paid editing. It's rather unusual that the notice doesn't have a "dismiss" link or any other way of removing the notice beyond editing my CSS to suppress all such notices.
