== Plot == 7cc3989c14 Anne McCaffrey created Pern in the novella *Weyr Search* (1967) when her second child Todd was eleven. In 2001 and 2002 she published her fifteenth Pern novel and second collection of short stories. *Dragon's Kin* was their first collaborative work. 7cc3989c14 The stories are not united by any theme, but three of four are set about 2500 years "After Landing", the beginning of human settlement on Pern. That is just before or during the "Ninth Pass" of the "Red Star", an erratic planet that periodically brings a biological menace from space. Those three stories therefore share a Pernese historical period with most of the previous books in the series (11 of 16). 7cc3989c14 == Plot description == 7cc3989c14 The seventeenth *Dragonriders of Pern* book, *A Gift of Dragons* was the last one in the series written by Anne McCaffrey alone, before the entry of her son Todd (starting with *Dragon's Kin*). It was published first in the US and four months later in the UK with the same cover art, by Del Rey Books and Bantam UK, two imprints of Random House. Three of the four stories were previously published, one as a small book. 7cc3989c14 == Terminology == 7cc3989c14 Unlike many other *Dungeons & Dragons* monsters, the beholder is an original creation for D&D, as it is not based on a creature from mythology or other fiction. Rob Kuntz's brother Terry Kuntz created the Beholder, and Gary Gygax detailed it for publication. 7cc3989c14 *Year of the Dragon* received critical acclaim, with reviewers noting how the game

successfully built upon the formula of its predecessors. The game sold more than 3 million copies worldwide. Year of the Dragon was the last Spyro title released for the original PlayStation, and the last developed by Insomniac Games due to Universal Interactive Studios and Sony's souring relationship. Year of the Dragon was followed by the multiplatform title Spyro: Enter the Dragonfly (2002), and was later remade as part of the Spyro Reignited Trilogy in 2018. 7cc3989c14 In D&D, dragons are depicted as any of various species of large, intelligent, magical, reptilian beasts, each typically defined by a combination of their demeanor and either the color of their scales or their elemental affinity. For example, a commonly presented species of dragon is the red dragon, which is named for its red scales, and known for its evil and greedy nature, as well as its ability to breathe fire. In the game, dragons are often adversaries of player characters, and less commonly, allies or helpers. 7cc3989c14 Powerful and intelligent, the fictional dragons of Dungeons & Dragons are reptiles with magical abilities and breath weapons. The different sub-species, distinguished by their coloring, vary in power. 7cc3989c14 An anime television series adaptation produced by Kyoto Animation aired in Japan between January and April 2017. A second season titled Miss Kobayashi's Dragon Maid S aired between July and September 2021. A video game titled Miss Kobayashi's Dragon Maid: Burst Forth!! Choro-gon Breath was released in Japan in March 2022 and in North America in August 2022. An anime film titled Miss Kobayashi's Dragon Maid: A Lonely Dragon Wants to Be Loved... 7cc3989c14

Beholders are one of the few classic Dungeons & Dragons monsters that Wizards of the Coast claims as Product Identity and as such was not released under its Open Game License. Beholders have been used on the cover of different Dungeons & Dragons handbooks, including the fifth edition Monster Manual. 7cc3989c14 Dragon's Kin may be considered the first of a trilogy by the McCaffreys, preceding Dragon's Fire and Dragon Harper. Primarily the three books feature

Kindan as a boy and young man, about 500 years after landing on Pern (500 AL). 7cc3989c14 Giants are humanoid creatures of great strength and size with a self-involved social focus and are usually presented as the "bad guys" in the game. They "often create their own societies away from the other races". All giants have low-light vision. As a group, they have no other special abilities or immunities. Dwarves have a bonus to their armor class against attacks from creatures of the giant type, due to their experience with fighting these oversized foes. 7cc3989c14 Prominent worms attested in medieval Germanic works include the dragon that killed Beowulf, the central dragon in the Völsung Cycle – Fáfnir, Nidhogg (Old Norse: Níðhöggr), and the great world serpent, Jörmungandr, including subcategories such as lindworms and sea serpents. 7cc3989c14
