Some references define technological fix as an "attempt to repair the harm of a technology by modification of the system", that might involve modification of the machine and/or modification of the procedures for operating and maintaining it. 89fc7814bd The aqua ion is associated, through hydrogen bonding with other water molecules... 89fc7814bd

On the Origin of Species Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection, although Lamarckism was also included as a mechanism of lesser importance. Chapter VI begins by saying the next three chapters will address possible objections to the theory, the first being that often no intermediate forms On the Origin of Species (or, more completely, On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life) is a work of scientific literature by Charles Darwin that is considered to be the foundation of evolutionary biology. It was published on 24 November 1859. inheritance. The book presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had collected on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence 89fc7814bd

Appropriate technology It was originally articulated as intermediate technology by the economist Ernst Friedrich "Fritz" Schumacher in his Appropriate technology is a movement (and its manifestations) encompassing technological choice and application that is small-scale, affordable by its users, labor-intensive, energy-efficient, environmentally sustainable, and locally autonomous. Both Schumacher and many modern-day proponents of appropriate technology also emphasize the technology as people-centered. It was originally articulated as intermediate technology by the economist Ernst Friedrich "Fritz" Schumacher in his work Small Is Beautiful. sustainable, and locally autonomous 89fc7814bd

Because observed astronomical objects do not possess an appreciable net electric charge (the magnetic fields of stars arise through other processes), the Kerr-Newman metric is primarily of theoretical interest. 89fc7814bd Hooke joint or Hooke's joint, after Robert Hooke, a polymath of the 17th century who contributed to knowledge of various clever mechanisms 89fc7814bd

Universal joint The universal joint is not a constant-velocity joint. It consists of a pair of hinges located close together, oriented at 90° to each other, connected by a cross shaft. proposed a solution to the nonuniform rotary speed of the universal joint: a pair of Hooke's joints 90° out of phase at either end of an intermediate shaft A universal joint (also called a universal coupling or U-joint) is a joint or coupling connecting rigid shafts whose axes are inclined to each other. It is commonly used in shafts that transmit rotary motion 89fc7814bd

System of National Accounts It is nowadays used by most countries in the world. Behind the accounts system, there is also a system of people: the people who are cooperating around the world to produce the statistics, for use by government agencies, businesspeople, media, academics and interest groups from all nations. Manuals have subsequently been released for the 1968 revision, the 1993 revision, and the 2008 revision. Accounting and recording The System of National Accounts or SNA (until 1993 known as the United Nations System of National Accounts or UNSNA) is an international standard system of concepts and methods for national accounts. The first international standard was published in 1953. Definitions of accounting terms, accounting concepts, account equations, account derivation principles and standard accounting procedures. The pre-edit version for the SNA 2025 revision was adopted by the United Nations Statistical Commission at its 56th Session in March 2025 89fc7814bd

Lime sulfur After elimination of residual solids (flocculation, decantation, and filtration), it is normally used as an aqueous solution, which is reddish-yellow in colour and has a distinctive offensive odor of hydrogen sulfide (H2S, rotten eggs). Moreover, once exposed In horticulture, lime sulfur (lime sulphur in British English, see American and British English spelling differences) is mainly a mixture of calcium polysulfides and thiosulfate (plus other reaction by-products as sulfite and sulfate) formed by reacting calcium hydroxide with elemental sulfur, used in pest control. partially oxidized forms of sulfur is particularly complex and all the intermediate steps or involved mechanisms are hard to unravel. It can be prepared by boiling in water a suspension of poorly soluble calcium hydroxide (lime) and solid sulfur together with a small amount of surfactant to facilitate the dispersion of these solids in water 89fc7814bd

The model lacks description... 89fc7814bd The aim of... 89fc7814bd Its basic design follows the pioneering LINC but has a smaller instruction set, which is an expanded version of the PDP-5 instruction set. To lower the cost of implementation, the system leaves out a number of commonly used functions which have to be written using combinations of other instructions. This leads to complex programs. 89fc7814bd

Customer Although such distinctions have no contemporary semantic weight, agencies In sales, commerce, and economics, a customer (sometimes known as a client, buyer, or purchaser) is the

recipient of a good, service, product, or an idea, obtained from a seller, vendor, or supplier via a financial transaction or an exchange for money or some other valuable consideration. services, while clients are those who receive personalized advice and solutions 89fc7814bd

Technological fix It now is used as a dismissive phrase A technological fix, technical fix, technological shortcut or (techno-)solutionism is an attempt to use engineering or technology to solve a problem (often created by earlier technological interventions). The technological fix is the idea that all problems can find solutions in better and new technologies. or both 89fc7814bd

U-joints are also sometimes called by various eponymous names, as follows: 89fc7814bd

Kerr-Newman metric As an electrovacuum solution, it only includes those charges associated with the magnetic field; it does not include any free electric charges. It is a vacuum solution which generalizes the Kerr metric (which describes an uncharged, rotating mass) by additionally taking into account the energy of an electromagnetic field, making it the most general asymptotically flat and stationary solution of the Einstein-Maxwell equations in general relativity. exploration. [citation needed] The Kerr-Newman solution is a special case of more general exact solutions of the Einstein-Maxwell equations with non-zero The Kerr-Newman metric describes the spacetime geometry around a mass which is electrically charged and rotating 89fc7814bd

Well-known examples of appropriate technology applications include: bike- and hand-powered water pumps (and other self-powered equipment), the bicycle, the universal nut sheller, self-contained solar lamps and... 89fc7814bd Cardan joint, after Gerolamo Cardano, a polymath of the 16th century who contributed to knowledge of various clever mechanisms, including gimbals 89fc7814bd Offshoots from the PDP-8 are the PDP-12 which has a processor that can run programs for the PDP-8 and LINC systems, and... 89fc7814bd Technological fixes are inevitable in modern technology. It has been observed that many technologies, although invented and developed to solve certain perceived problems, often create other problems in the process, known as externalities. In other words, there would be modification of the basic hardware, modification of techniques and procedures, or both... 89fc7814bd

PDP-8 Over 50,000 units were sold during the model's lifetime. Launched in 1965, it was the first minicomputer to sell for under \$20,000, and the \$25,000 mark for a complete system would later be a defining characteristic of the minicomputer class. 41. 1982, PDP-8 chapter "Chapter 8: Extended Arithmetic Element Type 182" p. Metal ions in aqueous solution The logarithm of the first hydrolysis constant is proportional to z^2/r for most aqua ions. Lanthanide and actinide aqua ions have higher solvation numbers (often 8 to 9), with the highest known being 11 for Ac^{3+} . well established for zinc(II) and cadmium(II) in dilute solutions. The solvation number, n , determined by a variety of experimental methods is 4 for Li^+ and Be^{2+} and 6 for most elements in periods 3 and 4 of the periodic table. Aqua ions are subject to hydrolysis. In concentrated solutions the Zn^{2+} ion may adopt a 4-coordinate, tetrahedral, structure A metal ion in aqueous solution or aqua ion is a cation, dissolved in water, of chemical formula $[\text{M}(\text{H}_2\text{O})_n]^{z+}$. The strength of the bonds between the metal ion and water molecules in the primary solvation shell increases with the electrical charge, z , on the metal ion and decreases as its ionic radius, r , increases 89fc7814bd
