These exposures are created sequentially and preserved for later processing and viewing as a motion picture. Capturing images with an electronic image sensor produces an electrical charge for each pixel in the image, which is electronically processed and stored in a video file for subsequent processing or display. Images captured with photographic emulsion result in a series of invisible latent images on the film stock, which are chemically "developed" into a visible image. The images on the film stock are projected for viewing in the same motion picture. 64c7f37f35 Merge to Mobile Suit Gundam SEED Destiny, Bloody Valentine War was redirected to Mobile Suit Gundam SEED#Plot back in August and I'm unaware of any complaints since then, so a similar treatment should work fine for this article. Also note that the above linked AFD took place in 2006. ￼￼￼￼￼￼￼ 22:08, 19 October 2009 (UTC)reply 64c7f37f35 Accepting merge nominations at MfD 64c7f37f35 Purge server cache 64c7f37f35 Comment while I can see how a section growing too large would be an issue, there shouldn't be so much plot information to begin with. The article is a large plot summary of Gundam Seed Destiny, which doesn't meet Wikipedia criteria for inclusion. Lacking mirrors allows mirrorless cameras to be smaller, lighter, and quieter than equivalent DSLRs, but may decrease battery life because of the need to constantly power the sensor and electronic viewfinder (EVF) during use. 64c7f37f35 Proposal to stop running donation banners 64c7f37f35 Centralized discussion 64c7f37f35

Consensus can change, and certainly has in three years. The article as it stands now is pure plot summary, presented as a real event, with neither hide nor hair of development, production, reception, real-world impact, or even references (the one "reference" in the article is actually an unreferenced note), despite being tagged for a year for these and other issues. It doesn't matter how important this is within the Gundam universe because notability is not inherited, and for the record, this only directly affected the Gundam SEED timeline, not "the entire Gundam universe". ￼￼￼￼￼￼￼ 20:10, 21 October 2009 (UTC)reply 64c7f37f35 Keep The last afd [1] had some convincing arguments in it. This is

part of a series that has been successfully growing for for decades now. This event is notable in its universe, affecting the anime series(one series dedicated entirely to it, 50 episodes), toy line, manga, and books. I'm not sure if any video games have this war featured in it or not. It isn't just some passive back story used once and forgotten. It affected the entire Gundam universe. Many cameras utilize one or more electronic displays to simulate a traditional viewfinder. In contrast, DSLRs use a mechanical movable mirror sitting behind the lens to direct light to the viewfinder, then redirect it to the image sensor at the moment that a photograph is taken. 64c7f37f35 == History == 64c7f37f35 policy 64c7f37f35 misc 64c7f37f35
