Cultured meat be soaked in a buffered ionic solution that employs osmosis to leach the water from bacteria and kill them. Meat analogue (meat alternative) List of meat Cultured meat, also known as cultivated meat among other names, is a form of cellular agriculture wherein meat is produced by culturing animal cells in vitro; thus growing animal flesh, molecularly identical to that of conventional meat, outside of a living animal. It has been noted for potential in lessening the impact of meat production on the environment and addressing issues around animal welfare, food security and human health. Cultured meat is produced using tissue engineering techniques pioneered in regenerative medicine
