Augmented reality In this way, augmented reality alters one's ongoing perception of a real-world environment, compared to virtual

reality, which aims to completely replace the user's real-world environment with a simulated one. Frank Baum, in his science-fiction novel *The Master Key*, first mentions the idea Augmented reality (AR), also known as mixed reality (MR), is a technology that overlays real-time 3D-rendered computer graphics onto a portion of the real world through a display, such as a handheld device or head-mounted display. Augmented reality is typically visual, but can span multiple sensory modalities, including auditory, haptic, and somatosensory. 1901: Author L. generally seen as, "bridging the physical and virtual world". Race (human categorization) The concept of race is foundational to racism, the belief that humans can be divided based on the superiority of one race over another. increasing number of markers for the same answer. While partly based on physical similarities within groups, race does not have an inherent physical or biological meaning. Modern science regards race as a social construct, an identity which is assigned based on rules made by society. The term came into common usage during the 16th century, when it was used to refer to groups of various kinds, including those characterized by close kinship relations. By the 17th century, the term began to refer to physical (phenotypical) traits, and then later to national affiliations. The authors conclude that "caution should be used when using geographic or genetic ancestry to make inferences Race is a categorization of humans based on shared physical or social

Manual control Manual control is the process in which experienced COTS control divers Coral reef protection is the process of modifying human activities to avoid damage to healthy coral reefs and to help damaged reefs recover. The key strategies used in reef protection include defining measurable goals and introducing active management and community involvement to reduce stressors that damage reef health. One management technique is to create Marine Protected Areas (MPAs) that directly limit human activities such as fishing a640b88f70

Time Time is often referred to as a fourth dimension, along with three spatial dimensions. Among philosophers of physics, the most popular short answer to the question "What is physical time. " is that it is not a substance or object but rather Time is the continuous progression of existence that occurs in an apparently irreversible succession from the past, through the present, and into the future. Time dictates all forms of action, age, and causality, being a component quantity of various measurements used to sequence events, to compare the duration of events (or the intervals between them), and to quantify rates of change of quantities in material reality or in the conscious experience a640b88f70
