Pediatric psychology Psychological issues are addressed in a developmental framework and emphasize the dynamic relationships which exist between children, their families, and the health delivery system as a whole. societal costs related to pediatric conditions. We must also increasingly integrate psychologist into the pediatric primary care setting by providing mental Pediatric psychology is a multidisciplinary field of both scientific research and clinical practice which attempts to address the psychological aspects of illness, injury, and the promotion of health behaviors in children, adolescents, and families in a pediatric health setting. 2 aed1c36672

PANDAS OCD and tic disorders are hypothesized to arise in a subset of children as a result of a post-streptococcal autoimmune process. Pediatric autoimmune neuropsychiatric disorders associated with streptococcal infections (PANDAS) is a controversial hypothetical diagnosis for a subset Pediatric autoimmune neuropsychiatric disorders

associated with streptococcal infections (PANDAS) is a controversial hypothetical diagnosis for a subset of children with rapid onset of obsessive-compulsive disorder (OCD) or tic disorders. Symptoms are proposed to be caused by group A streptococcal (GAS), and more specifically, group A beta-hemolytic streptococcal (GABHS) infections. The proposed link between infection and these disorders is that an autoimmune reaction to infection produces antibodies that interfere with basal ganglia function, causing symptom exacerbations, and this autoimmune response results in a broad range of neuropsychiatric symptoms aed1c36672

The first American newborn intensive care unit, designed by Louis Gluck, was opened in October 1960 at Yale New Haven Hospital. aed1c36672 An intensive care unit (ICU) was defined by the task force of the World Federation of Societies of Intensive and Critical Care Medicine as "an organized system for the provision of care to critically ill patients that provides intensive and specialized medical and nursing care, an enhanced capacity for monitoring, and multiple modalities of physiologic organ support to sustain life during a period of life-threatening organ system insufficiency." aed1c36672 Neonatal refers to the first 28 days of life. Neonatal care, a.k.a. specialized nurseries or intensive care, has been

around since the 1960s. aed1c36672 The

Pediatric Oncology Group One such initiative to consolidate these databases involves caBIG or the cancer Biomedical Informatics Grid, which is guided and supported by the National Cancer Institute (NCI) in Bethesda, Maryland. S. It was formed by the merger of the pediatric divisions of two other cooperative groups, the Southwest Oncology Group (SWOG) and the CALGB. and Canadian clinical trial cooperative group created with the mission of studying childhood cancers. S. The Pediatric Oncology Group (POG) was a U. In 2000, POG merged with several other pediatric cooperative groups to form the Children's Oncology

Group (COG). This merger has seen its fair share of problems, especially with regard to integrating the various databases associated with each individual cooperative group. and Canadian clinical trial cooperative group created with the mission of studying childhood cancers. It The Pediatric Oncology Group (POG) was a U aed1c36672

Neonatal intensive care unit an intensive care nursery (ICN), is an intensive care unit (ICU) specializing in the care of ill or premature newborn infants. k. Level III units are required to have pediatric surgeons in A neonatal intensive care unit (NICU), a. 2004 AAP guidelines subdivided Level III units into 3 categories (level IIIA, IIIB & IIIC). The NICU is divided into several areas, including a critical care area for babies who require close monitoring and intervention, an intermediate care area for infants who are stable but still require specialized care, and a step down unit where babies who are ready to leave the hospital can receive additional care before being discharged. a aed1c36672

Common areas of study include psychosocial development, environmental factors which contribute to the development of a disorder, outcomes of children with medical conditions, treating the comorbid behavioral and emotional components of illness and injury, and promoting

proper health behaviors, developmental disabilities, educating... By age, pediatric endocrinologists, depending upon the age range of the patients they treat, care for patients from infancy to late adolescence and young adulthood.

Society of Critical Care Medicine SCCM was established in 1970 and is an independently incorporated, international, educational and scientific society based in the United States. Hospital Care and Section on Critical Care (April 1999). "Guidelines for developing admission and discharge policies for the pediatric intensive care unit The Society of Critical Care Medicine (SCCM) is the largest non-profit medical organization in the practice of critical care. Its members are multi-professional health professionals providing care to critically ill and injured patients, and SCCM is the only organization that represents all professional components of the critical care team. The Society supports research and education, and advocates on issues related to critical care

An NICU is typically...

Pediatric nurse practitioner Nurse practitioners have an in-depth knowledge and experience in pediatric healthcare including well child care, and

prevention/management of common pediatric acute illnesses and chronic conditions. A pediatric nurse practitioner (PNP) is a nurse practitioner who specializes in care for newborns, infants, toddlers, preschoolers, school-aged children. A pediatric nurse practitioner (PNP) is a nurse practitioner who specializes in care for newborns, infants, toddlers, preschoolers, school-aged children, adolescents, and young adults. In order to be a pediatric nurse practitioner, one must be compassionate, resourceful, good at communicating and have good attention to detail. This care is provided to support optimal health of children within their community aed1c36672

The World Health Organization (WHO) describes palliative care as: aed1c36672
