

Junqueira Histology Test Bank

Picric acid Picrosirius red, a histological stain for collagen. Its IUPAC name is 2,4,6-trinitrophenol (TNP). It has also been used as medicine (antiseptic, burn treatments) and as a dye. Like other strongly nitrated organic compounds, picric acid is an explosive, which is its primary use. It is one of the most acidic phenols. The name "picric" comes from Greek: πικρός (pikros), meaning "bitter", due to its bitter taste. Clinical chemistry laboratory testing utilizes picric acid for the Jaffe reaction to test for creatinine. Picric acid is an organic compound with the formula (O₂N)₃C₆H₂OH 1b881d494f
