Radio-controlled aircraft The transmitter continuously communicates with a receiver within the craft that sends signals to servomechanisms (servos) which move the control surfaces based on the position of joysticks on the transmitter. more, from long ago. The control surfaces, in turn, directly affect the orientation of the plane. RC Scale model aircraft can be of any type of steerable airship lighter-than-air (LTA) aviation craft, or more normally, of the heavier-than-air A radio-controlled aircraft (often called RC aircraft or RC plane) is a small flying machine that is radio controlled by an operator on the ground using a hand-held radio transmitter 4c850a52f7

Paper crafts are known in most societies that use paper, with certain kinds of crafts being particularly associated with specific countries or cultures. In Caribbean countries paper craft is unique to Caribbean culture which reflect the importance of native animals in life of people. 4c850a52f7 Scale models are constructed of plastic, wood, or metal. They are usually painted with enamel, lacquer, or acrylics. 4c850a52f7

Model aircraft Non-flying models are also termed static, display, or shelf models. resin. Flying models range from simple toy gliders made of sheets of paper, balsa, card stock or foam polystyrene to powered scale models built up from A model aircraft is a physical model of an existing or imagined aircraft, and is built typically for display, research, or amusement. Model aircraft are divided into two basic groups: flying and non-flying 4c850a52f7

Origami The goal is to transform a flat square sheet of paper into a finished sculpture through folding and sculpting techniques. In general, these designs begin with a square sheet of paper whose sides may be of different Origami (折り紙) is the Japanese art of paper folding. Origami folders often use the Japanese word kirigami to refer to designs which use cuts. In modern usage, the word origami is often used as an inclusive term for all folding practices, regardless of their culture of origin.

designs. The best-known origami model is the Japanese paper crane. Modern origami practitioners generally discourage the use of cuts, glue, or markings on the paper 4c850a52f7

In addition to the aesthetic value of paper crafts, various forms of paper crafts are used in the education of children. Paper is a relatively inexpensive medium, readily available, and... 4c850a52f7 Flying models range from simple toy gliders made of sheets... 4c850a52f7 Static models range from mass-produced toys in white metal or plastic to highly accurate and detailed models produced for museum display and requiring thousands of hours of work. Many are available in kits, typically made of injection-molded polystyrene or resin. 4c850a52f7 Some of the different types of physical transformations which are used in 3D printing include melt extrusion, light polymerization, continuous liquid interface production and sintering. 4c850a52f7 In the detailed Japanese classification, origami is divided into stylized ceremonial origami (折紙, girei origami) and recreational origami (遊紙, yūgi origami), and only recreational origami is generally recognized as origami. In Japan, ceremonial origami is generally called "origata" (ja:折り紙) to distinguish... 4c850a52f7

Architectural model including paper, plaster, plastic, resin, wood, glass, and metal. They are made using a variety of materials including paper, plaster, plastic, resin, wood, glass, and metal. Models are built either with traditional handcraft techniques or via 3D printing technologies An architectural model is a type of scale model made to study aspects of an architectural design or to communicate design intent 4c850a52f7

Aircraft manufacturers and researchers make wind tunnel models for testing aerodynamic properties, for basic research, or for the development of new designs. Sometimes only part of the aircraft is modelled. 4c850a52f7

Paper craft Papermaking by hand is also a paper craft. Paper and card stock lend themselves to a wide range of techniques and can be folded, curved, bent, cut, glued, molded, stitched, or layered. Paper model that contains origami and card modeling. Origami is the process of making a paper model by folding a single piece of paper without using glue or cutting Paper models, also called card models or papercraft, are models constructed mainly from sheets of heavy paper, paperboard, card stock, or foam 4c850a52f7

Models are built either with traditional handcraft techniques or via 3D printing technologies such as stereolithography, fused

filament fabrication, and selective laser sintering. 4c850a52f7

Scale model requirements of a small model are different from those of a full-size craft, so flying models are seldom fully accurate to scale. Flying model aircraft are one A scale model is a physical model that is geometrically similar to an object (known as the prototype). Models built to the same scale as the prototype are called mockups. Scale models are generally smaller than large prototypes such as vehicles, buildings, or people; but may be larger than small prototypes such as anatomical structures or subatomic particles 4c850a52f7

Flying RC aircraft as a hobby grew substantially from the 2000s with improvements in the cost, weight, performance, and capabilities of motors, batteries and electronics. Scientific, government, and military organizations are also using RC aircraft for experiments, gathering weather readings, aerodynamic modeling, and testing. A... 4c850a52f7

3D printing processes 3D printing is also known as additive manufacturing, because the numerous available 3D printing process tend to be additive in nature, with a few key differences in the technologies and the materials used in this process. Complex 3D models are printed with many overlapping drops fused together into layers as defined by the sliced CAD file. Inkjet technology allows 3D models to A variety of processes, equipment, and materials are used in the production of a three-dimensional object via additive manufacturing 4c850a52f7

Scale models are used as tools in engineering design and testing, promotion and sales, filmmaking special effects, military strategy, and hobbies such as rail transport modeling, wargaming and racing; and as toys. Model building is also pursued as a hobby for the sake of artisanship. 4c850a52f7

Pulp and paper industry Papermaking as a craft is ancient, and for centuries it used various fibers, mainly The pulp and paper industry comprises companies that use wood, specifically pulpwood, as raw material and produce pulp, paper, paperboard, and other cellulose-based products. the steam-heated can dryer being the most prevalent on paper machines 4c850a52f7
