Circular economy 8 (1): 43. The main three principles required for the transformation to a circular economy are: designing out waste and pollution, keeping products and materials in use, and regenerating natural systems. "Designing the Business Models for Circular Economy—Towards the Conceptual Framework". A circular economy (CE), also referred to as circularity, is a model of resource production and consumption in any economy that involves sharing, leasing, reusing, repairing, refurbishing, and recycling existing materials and products for as long as possible. Sustainability. Bibcode:2016Sust. The concept aims to tackle global challenges such as climate change, biodiversity loss, waste, and pollution by emphasizing the design-based implementation of the three base principles of the model. Mateusz (2016-01-18). CE is defined in contradistinction to the traditional linear economy 7ea900400c
