A million years prior to the dawn of Homo sapiens, two immortal, shapeshifting aliens, wholly unknown to each other, roam the Earth without memory of their origin or their purpose. In the year 2019, an artifact is discovered off the coast of Samoa, buried beneath the ocean floor. The mysterious find attracts the alien beings—the "changeling" and the "chameleon"—to Samoa, where one ponders the meaning of the object and the other speculates on its relationship to each of them. Both immortals seek each other for different reasons: one harbours good intentions toward humanity and wishes to protect all life, while the other is extremely hostile and enjoys killing.

Characters of the DC Extended Universe The shared universe, much like the original DC Universe in the comics, was established by crossing over common plot elements, settings, cast, and characters, and crossed over with separate timelines from other DC-licensed film series in The Flash to create a "multiverse" before being largely rebooted as the new DC Universe franchise under new management from DC Studios, with the previous universe concluding in 2023 with Aquaman and the Lost Kingdom. Despite numerous separate film franchises being released in the past based on single characters such as Superman and Batman, none of those film series were interconnected.
