Treatment of equine lameness Additionally, autologous stem cells (those harvested from the patient) requires The treatment of equine lameness is a complex subject. but is currently expensive, requiring harvesting and processing of the cells. The end goal is to reduce the pain and inflammation associated with injury, to encourage the injured tissue to heal with normal structure and function, and to ultimately return the horse to the highest possible post-recovery performance. Treatment may be applied locally, systemically, or intralesionally, and the strategy for treatment

may change as healing progresses. Lameness in horses has a variety of causes, and treatment must be tailored to the type and degree of injury, as well as the financial capabilities of the owner f03bb214f6

Susceptibility to acne is primarily genetic in 80% of cases. The roles of diet and cigarette smoking in the condition are unclear, and neither cleanliness nor exposure to sunlight are associated with acne. In both sexes, hormones called androgens appear to be part of the underlying... f03bb214f6 Talk:(S)-Equol f03bb214f6

2011 in science Raya-Rivera, Atlantida; et al. 2024-04-24. The year saw a total of 78 successful orbital spaceflights, as well as numerous advances in fields such as electronics, medicine, genetics, climatology and robotics. (2011). "Tissue-engineered autologous urethras for patients who need reconstruction: an observational study" The year 2011 involved many significant scientific events, including the first artificial organ transplant, the launch of China's first space station and the growth of the world population to seven billion f03bb214f6

Breast augmentation ISBN 978-3642004728 In medicine, breast augmentation or augmentation mammoplasty is a cosmetic surgery procedure that uses either a breast implant or a fat-graft to realise a mammoplasty to increase the size, change the shape, or alter the texture of the breasts, either as a cosmetic procedure or as correction of congenital defects of the breasts and the chest wall. Berlin,

Heidelberg: Springer. Retrieved August 2, 2025. Autologous Fat Transfer: Art, Science, and Clinical Practice. Schiffman MA (2010) f03bb214f6

Talk:13q deletion syndrome f03bb214f6 Talk:(R,R)-Tetrahydrochrysene f03bb214f6 To augment the breast hemisphere, a breast implant filled with either saline solution or a silicone gel creates a spherical augmentation. The fat-graft transfer augments the size and corrects contour defects of the breast hemisphere with grafts of the adipocyte fat tissue, drawn from the body of the woman. In a breast reconstruction procedure, a tissue expander (a temporary breast implant device) is emplaced and filled with saline solution to shape... f03bb214f6 Talk:16 α -LE2 f03bb214f6 Talk:1629–31 Italian plague f03bb214f6 2022-12-29 via PetScan f03bb214f6 Talk:16 α -Hydroxyestrone f03bb214f6 Talk:100K Pathogen Genome Project f03bb214f6 Talk:(von Zumbusch) acute generalized pustular psoriasis f03bb214f6 Talk:(S,S)-Tetrahydrochrysene f03bb214f6 Talk:1,1,1,2-Tetrafluoroethane f03bb214f6 Replace [[with [[Talk: f03bb214f6 2011 was declared the International Year of Forests and Chemistry by the United Nations. f03bb214f6

Acne It primarily affects skin with a relatively high number of oil glands, including the face, upper part of the chest, and back. The resulting appearance can lead to lack of confidence, anxiety, reduced self-esteem, and, in extreme cases, depression or thoughts of suicide. microspheres with collagen; human and bovine collagen derivatives, and fat harvested from the person's own body (autologous fat transfer). Typical features of the condition include blackheads or whiteheads, pimples, oily skin, and possible scarring. Microneedling is a procedure Acne also known as acne vulgaris, is a long-term skin condition that occurs when dead skin cells and oil from the skin clog hair follicles f03bb214f6

Stem-cell therapy has become controversial following developments such as the ability of scientists to isolate and culture embryonic stem cells, to create stem cells using somatic cell nuclear transfer, and their use of techniques to create induced pluripotent stem cells. This controversy... f03bb214f6

Stem-cell therapy This usually takes the form of a bone marrow or peripheral blood stem cell transplantation, but the cells can also be derived from umbilical cord blood. "Intracoronary autologous bone marrow cell transfer after myocardial infarction: the BOOST-2 randomised placebo-controlled clinical trial".
Research is underway to develop various sources for stem cells as well as to apply stem-cell treatments for neurodegenerative diseases and conditions such as diabetes and heart disease. As of 2024, the only FDA-approved therapy using stem cells is hematopoietic stem cell transplantation. European Stem-cell therapy uses

stem cells to treat or prevent a disease or condition f03bb214f6
