

Marijn Haverbeke Eloquent Javascript

JavaScript is a high-level, often just-in-time-compiled language that conforms to the ECMAScript standard. It has dynamic typing, prototype-based object-orientation, and first-class functions. It is multi-paradigm, supporting event-driven, functional, and imperative programming styles. It has application programming interfaces (APIs) for working with text, dates, regular...

Immediately invoked function expression It was popular in JavaScript as a method of supporting modular programming before the introduction of more standardized solutions such as CommonJS and ES modules.
