Hospice Hospice care in the United States is largely defined by the practices of the Medicare system and other health insurance providers, which cover inpatient or at-

home Hospice care is a type of health care that focuses on the palliation of a terminally ill patient's pain and symptoms and attending to their emotional and spiritual needs at the end of life. Hospice care prioritizes comfort and quality of life by reducing pain and suffering. Hospice care provides an alternative to therapies focused on life-prolonging measures that may be arduous, likely to cause more symptoms, or are not aligned with a person's goals f2e419345c

From 1953 through 1963, the category was known as the Pulitzer Prize for Local Reporting, No Edition Time. From 1964 to 1984, it was known as the Pulitzer Prize for Local Investigative Specialized Reporting. f2e419345c

Formulary (pharmacy) "The new medicare drug benefit: formularies and their potential effects on access to medications" A formulary is a list of pharmaceutical drugs, often decided upon by a group of people, for various reasons such as insurance coverage or use at a medical facility. Traditionally, a formulary contained a collection of formulas for the compounding and testing of medication (a resource closer to what would be referred to as a pharmacopoeia today). 28 October 2021. Today, the main function of a prescription formulary is to specify particular medications that are approved to be prescribed at a particular hospital, in a particular health system, or under a particular health insurance policy. Huskamp HA, Keating NL (2005). p. 1. (NFI-2021). The development of prescription formularies is based on evaluations of efficacy, safety, and cost-effectiveness of drugs f2e419345c
