

Laboratory Techniques In Sericulture 1st Edition

Archives are generally grouped by month of Main Page appearance. (Currently, DYK hooks are archived according to the date and time that they were taken off the Main Page.) To find which archive contains the fact that appeared on Did you know, go to the article's talk page and follow the archive link in the DYK talk page message box or the Article Milestones box. a5a1ee2bdd The term herbology is misleading in the sense that, while plant elements are by far the most commonly used substances, animal, human, and mineral products are also used, some of which are poisonous. In the Huangdi Neijing they are referred to as 毒藥 (pinyin: dúyào) which means "poison-medicine". Paul U. Unschuld points out that this is similar etymology... a5a1ee2bdd

Louis Pasteur Pasteur's works are credited with saving millions of lives through the developments of vaccines for rabies and anthrax.)^[circular reference] Louis Pasteur (, French: [lwi pastœʁ] ; 27 December 1822 – 28 September 1895) was a French chemist, pharmacist, and microbiologist renowned for his discoveries of the principles of vaccination, microbial fermentation, and pasteurization, the last of which was named after him. (See fr:Sériciculture in the French Wikipedia. He is regarded as one of the founders of modern bacteriology and has been honored as the "father of bacteriology" and the "father of microbiology" (together with Robert Koch; the latter epithet. His research in chemistry led to remarkable breakthroughs in the understanding of the causes and preventions of diseases, which laid down the foundations of hygiene, public health and much of modern medicine. Pasteur's success against pébrine, French sericulture had not been saved from damage a5a1ee2bdd

Glossary of agriculture agricultural products from cell cultures grown in a laboratory, such as cultured meat, by using techniques of

molecular biology and biochemistry to directly This glossary of agriculture is a list of definitions of terms and concepts used in agriculture, its sub-disciplines, and related fields, including horticulture, animal husbandry, agribusiness, and agricultural policy. For other glossaries relevant to agricultural science, see Glossary of biology, Glossary of ecology, Glossary of environmental science, and Glossary of botanical terms a5a1ee2bdd

Science and technology in China From the 1980s to the 1990s, the government of the People's Republic of China successively launched the 863 Program and the "Strategy to Revitalize the Country Through Science and Education", which greatly promoted the development of China's science and technological institutions. The number of research scientists and engineers increased rapidly in private enterprises while they declined in state owned Science and technology in the People's Republic of China have developed rapidly since the 1980s to the 2020s, with major scientific and technological progress over the last four decades. applications, and R&D laboratories. These actions undertaken by the Chinese government are seen as crucial foundations for bolstering the nation's socioeconomic. Governmental focus on prioritizing the advancement of science and technology in China is evident in its allocation of funds, investment in research, reform measures, and enhanced societal recognition of these fields a5a1ee2bdd

Official naming citations of newly named small Solar System bodies are approved and published in a bulletin by IAU's Working Group for Small Bodies Nomenclature (WGSBN). Before May 2021, citations were published in MPC's Minor Planet Circulars for many decades. Recent citations can also be found on the JPL Small-Body Database (SBDB). Until his death in 2016, German astronomer Lutz D. Schmadel compiled these citations into the Dictionary of Minor... a5a1ee2bdd

Chinese herbology The toxicity in some cases could be confirmed by modern research (i. , in scorpion); in some cases it could not (i. A Nature editorial described TCM as "fraught with pseudoscience", and said that the most obvious reason why it has not delivered many cures is that the majority of its treatments have no logical mechanism of action. e. than laboratory analysis. e. , in Curculigo) Chinese herbology (traditional Chinese: 中藥; simplified Chinese: 中药; pinyin: zhōngyào xué) is the theory of traditional Chinese herbal therapy, which accounts for the majority of treatments in traditional Chinese medicine (TCM) a5a1ee2bdd

Insect pheromones They thus differ from kairomones, in other words, neurotransmitters that transmit information to non-species organisms. Intraspecific communication of insects via these substances takes place in a variety of ways and serves, among other things, to find sexual partner, to maintain harmony in a colony of socially living insects, to mark territories or to find nest sites and food sources. Insects produce pheromones in special glands and release them into the environment. It was only after almost 20 years of work that he finally succeeded in extracting Insect pheromones are neurotransmitters that serve the chemical communication between individuals of an insect species. is used for sericulture and its breeding and keeping was well known. In the pheromone receptors of the sensory cells of the recipient, they produce a nerve stimulus even in very low concentrations, which

ultimately leads to a behavioral response a5a1ee2bdd

Timeline of historic inventions The dates in this article make frequent use of the units mya and kya, which refer to millions and thousands of years ago, respectively. 3630 BC: Silk garments (sericulture) in China 3500 BC: Probable first domestication of the horse in The timeline of historic inventions is a chronological list of particularly significant technological inventions and their inventors, where known. This page lists nonincremental inventions that are widely recognized by reliable sources as having had a direct impact on the course of history that was profound, global, and enduring. in the countries of Ukraine, Poland, and Germany a5a1ee2bdd

Wikipedia:Recent additions/2013/June Recently created new articles, greatly expanded former stub articles and recently promoted good articles are eligible; you can submit them for consideration. and a new port. that Mary Anne Whitby, who had reintroduced sericulture to England in the 1830s, carried out selective breeding experiments on her silkworms This is a record of material that was recently featured on the Main Page as part of Did you know (DYK) a5a1ee2bdd

Meanings of minor-planet names: 8001–9000 (2003). The list below concerns those minor planets in the specified number-range that have received names, and explains the meanings of those names. Retrieved 25 June 2019. Schmadel, Lutz D. "JPL – Solar System Dynamics: Discovery Circumstances". Jet Propulsion Laboratory. Dictionary of Minor As minor planet discoveries are confirmed, they are given a permanent number by the IAU's Minor Planet Center (MPC), and the discoverers can then submit names for them, following the IAU's naming conventions a5a1ee2bdd

In 1959, the German biochemist... a5a1ee2bdd Edit the DYK archive navigation template a5a1ee2bdd
