Biomimetics especially in remote areas and may also be to assist in training neural networks to recognize polarization patterns. Some air conditioning systems use Biomimetics or biomimicry is the emulation of the models, systems, and elements of nature for the purpose of solving complex human problems. A closely related field is bionics. The terms "biomimetics" and "biomimicry" are derived from Ancient Greek: βίος (bios), life, and μίμησις (mīmēsis), imitation, from μιμεῖσθαι (mīmeisthai), to imitate, from μῖμος (mimos), actor d979e43c84

Evolution is a feature of biological systems for over 3.8 billion years according to observed life appearance estimations. It has evolved species with high performance using commonly found materials. Surfaces of solids interact with other surfaces and the environment and derive the properties of materials. Biological materials are highly organized from the molecular to the nano-, micro-, and macroscales, often in a hierarchical... d979e43c84
