

# **Bendix King Kt76a Transponder Installation Manual**

Air traffic control radar beacon system It consists of a rotating ground antenna and transponders in aircraft. When the beam strikes an aircraft, the transponder transmits a return signal back giving information such as altitude and the Squawk Code, a four digit code assigned to each aircraft that enters a region. ATCRBS assists air traffic. The ground antenna sweeps a narrow vertical beam of microwaves around the airspace. This information can include flight number designation and altitude of the aircraft. TailLight Consortium AlliedSignal Aerospace (1996) Bendix/King KT76A/78A ATCRBS Transponder Maintenance Manual. Information about this aircraft is then entered into the system and subsequently added to the controller's screen to display this information when queried. (Rev. 6) (Dead link 2016) RTCA/DO-181C, June The air traffic control radar beacon system (ATCRBS) is a system used in air traffic control (ATC) to enhance surveillance radar monitoring and separation of air traffic
