Jellyfish Jellyfish, also known as sea jellies or simply jellies, are the medusa-phase of certain gelatinous members of the subphylum Medusozoa, which is a major Jellyfish, also known as sea jellies or simply jellies, are the medusa-phase of certain gelatinous members of the subphylum Medusozoa, which is a major part of the phylum Cnidaria. Jellyfish are mainly free-swimming marine animals, although a few are anchored to the seabed by stalks rather than being motile. They are made of an umbrella-shaped main body made of mesoglea, known as the bell, and a collection of trailing tentacles on the underside

Cannonball jellyfish Cannonballs are prominent from North America's eastern seaboard to the Gulf. They are genetically different from the individuals found in the North Atlantic - but are commonly misidentified as such. Its common name derives from its similarity to a cannonball in shape and size. These arms function in propulsion and as an aid in catching prey. Underneath the body is a cluster of oral arms that extend out around the mouth. The rim is often colored with brown pigment. Its dome-

shaped bell can reach 25 cm (10 in) in diameter. Its The cannonball jellyfish (*Stomolophus meleagris*), also known as the cabbagehead jellyfish, is a species of jellyfish in the family Stomolophidae. There are several known undescribed *Stomolophus* species found in the Pacific and South Atlantic that exhibit pale to blue pigment. The cannonball jellyfish (*Stomolophus meleagris*), also known as the cabbagehead jellyfish, is a species of jellyfish in the family Stomolophidae 532919de66

Jellyfish Lake is connected to the ocean through fissures and tunnels in the limestone of an ancient Miocene reef. However, the lake is sufficiently isolated and the conditions are different enough that the diversity of species in the lake is greatly reduced from the nearby lagoon. The golden jellyfish, *Mastigias papua etpisoni*, and possibly other species in the lake, have evolved to be substantially... 532919de66

Jellyfish Lake Eil Malk is a part of the Rock Islands, a group of small, rocky, mostly uninhabited islands in Palau's Southern Lagoon, between Koror and Peleliu. Jellyfish Lake (Palauan: Ongeim'l Tketau, lit. There are about 70 other marine lakes located throughout the Rock Islands. 'Fifth Lake') is a marine lake located on Eil Malk island in Palau. Millions of golden jellyfish migrate horizontally across the lake daily. 'Fifth Lake') is a marine lake located on Eil Malk island in Palau. Eil Malk is a part of the Rock Islands Jellyfish Lake (Palauan: Ongeim'l Tketau, lit 532919de66

National Museum of Natural History With 4. 4 million visitors in 2023, it was the third most-visited museum in the United States. The National Museum of Natural History (NMNH) is a natural history museum administered by the Smithsonian Institution, located on the National Mall in The National Museum of Natural History (NMNH) is a natural history museum administered by the Smithsonian Institution, located on the National Mall in Washington, D. C. , United States. It has free admission and is open 364 days a year 532919de66

Lion's mane jellyfish 6 m (120 ft) long. It is common in the English Channel, Irish Sea, North Sea, and in

western Scandinavian waters south to Kattegat and Øresund. It may also drift into the southwestern part of the Baltic Sea (where it cannot breed due to the low salinity). Similar jellyfish – which may be the same species – are known to inhabit seas near Australia and New Zealand. The largest recorded specimen was measured off the coast of Massachusetts in 1865 and had a bell with a diameter of 210 centimetres (7 feet) and tentacles around 36. Lion's mane jellyfish have been observed below 42°N latitude for some. Its range is confined to cold, boreal waters of the Arctic, northern Atlantic, and northern Pacific Oceans. Its range is confined to cold, boreal waters of the Arctic The lion's mane jellyfish (*Cyanea capillata*) is one of the largest known species of jellyfish. The lion's mane jellyfish (*Cyanea capillata*) is one of the largest known species of jellyfish

Superfast Jellyfish The single was released on 9 May 2010. The single was released "Superfast Jellyfish" is the second single released from British alternative band Gorillaz' third studio album, Plastic Beach. "Superfast Jellyfish" is the second single released from British alternative band Gorillaz; third studio album, Plastic Beach

Calvadosia cruxmelitensis *Calvadosia cruxmelitensis* is a stalked jellyfish which inhabits the intertidal and sublittoral zones of rocky coasts in south-western England and the *Calvadosia cruxmelitensis* is a stalked jellyfish which inhabits the intertidal and sublittoral zones of rocky coasts in south-western England and the Atlantic coast of Ireland

Via pulsating contractions, the bell can provide propulsion for locomotion through open water. The tentacles are armed with stinging cells and may be used to capture prey or to defend against predators. Jellyfish have a complex life cycle, and the medusa is normally the sexual phase, which produces planula larvae. These then disperse widely and enter...

The Thing About Jellyfish The book follows Suzy Swanson, the protagonist and narrator The Thing About

Opened in 1910, the museum on the National Mall was one of the first Smithsonian buildings constructed exclusively to hold the national collections and research facilities. The main building has an overall area of 1.5 million square feet (140,000 m²) with 325,000 square feet (30,200 m²) of exhibition and public space and houses over 1,000 employees. The museum's collections contain over 146 million specimens of plants, animals, fossils, minerals, rocks, meteorites... Like most other hydrozoans, *T. dohrnii* begin their lives as tiny, free-swimming larvae known as planulae. As a planula settles down, it gives rise to a colony of polyps that are attached to the sea floor. All the polyps and jellyfish arising from a single planula are genetically identical clones. The polyps form into an extensively branched form, which is not commonly seen in most jellyfish. Jellyfish, also known as medusae, then bud off these polyps and continue...

Lisa-ann Gershwin *Jellyfish - A Natural History* (2016). She provides independent advice related to jellyfish worldwide to the media, online and via The Jellyfish App. She provides independent advice related to jellyfish worldwide to the media, online and via The Jellyfish App. She was Lisa-ann Gershwin, also known as Lisa Gershwin, is an American-Australian biologist based in Launceston, Tasmania, who has described over 200 species of jellyfish, and written and co-authored several non-fiction books about Cnidaria (jellyfish and allies) including *Stung*. (2013) and *Jellyfish - A Natural History* (2016). She was an unsuccessful candidate in the 2021 Tasmanian state election running as an independent in the electorate of Clark
