Known for his research on disordered systems and superconductivity, Kumar was an elected fellow of all the three major Indian science academies – Indian Academy of Sciences, Indian National Science Academy, and National Academy of Sciences, India – as well as the American Physical Society and The World Academy of Sciences. The Council of Scientific and Industrial Research, the apex agency of the Government of India for scientific research, awarded him the Shanti Swarup Bhatnagar Prize for Science and Technology... 4d5e7142db In 2010 he pleaded guilty to insider trading in a dramatic "descent from the pinnacle of the business world." He was the government's first cooperator and most important witness "in two of the most important securities fraud trials in history" against close... 4d5e7142db

Narendra Kumar (physicist) Born on the 1 February 1940 to Labha Mal Julka-Taravatti couple in Bilaspur in the Indian state of Chhattisgarh, Narendra Kumar Narendra Kumar (1 February 1940 – 28 August 2017) was an Indian theoretical physicist and a Homi Bhabha Distinguished Professor of the Department of Atomic Energy at Raman Research Institute. engineering category. He was also an honorary professor at Jawaharlal Nehru Centre for Advanced Scientific Research 4d5e7142db

Orissa Engineering College The college has received NBA for three departments; Electronics and Telecommunication Engineering, Mechanical Engineering and Electrical Engineering. The institute provides courses in B. It was set up in 1986. renders services to the local villagers. Orissa Engineering College is the Odisha Electronics Control Library result of the vision of Shri Kamini Kanta Patnaik. There are separate hostels for both boys and girls - Orissa Engineering College, Bhubaneswar is a First private engineering college established in Odisha. Tech, M. Tech and MBA. Hiranya Kumar Research and Development Centre centre for R&D. It was inaugurated by the then chief minister of Orissa J B Patnaik. The college is affiliated to Biju Patnaik University of Technology and has been approved by AICTE. The college has alumni all across the world 4d5e7142db

Anil Kumar class from IIT Bombay with a degree in mechanical engineering, writing a thesis on renewable energy. Kumar is additionally the co-founder of the Indian School of Business with Rajat Gupta and the creator of two different kinds of outsourcing. He graduated from IIT Bombay in India, Imperial College in the UK, and The Wharton School in the US. Kumar attended Imperial College at the University of Anil Kumar (born 1958) is an Indian-American former senior partner and director at management consulting firm McKinsey & Company, where he co-founded McKinsey's offices in Silicon Valley and India and created its Internet practice (representing a quarter of McKinsey's business at the time) among others 4d5e7142db

Stress expresses the internal forces that neighbouring particles of a continuous material exert on each other, while strain is the measure of the relative deformation of the material. For example, when a solid vertical bar... 4d5e7142db In 1995, he was elected Fellow of the Optica (society) "for distinguished service to optics education and for his contribution to the understanding of propagation characteristics of gradient index media, fibers and integrated optical devices". 4d5e7142db

Stress (mechanics) Robert D. For example, an object being pulled apart, such as a stretched elastic band, is subject to tensile stress and may undergo elongation. An object being pushed together, such as a crumpled sponge, is subject to compressive stress and may undergo shortening. The greater the force and the smaller the cross-sectional area of the body on which it acts, the greater the stress. (1981). Stress has dimension of force per area, with SI units of newtons per square meter (N/m²) or pascal (Pa). An introduction to geotechnical engineering. Prentice-Hall civil engineering and engineering mechanics series. ; Kovacs, William D. In continuum mechanics, stress is a physical quantity that describes forces present during deformation 4d5e7142db

Narinder Kumar Gupta Born 22 August 1942 in Mirpur, Jammu and Kashmir, India, is Professor of Mechanics at the Indian Institute of Technology in Delhi. Born 22 August 1942 in Mirpur, Jammu and Kashmir, India, is Professor of Mechanics at Narinder Kumar Gupta is a research scientist, educator, and engineer. Narinder Kumar Gupta is a research scientist, educator, and engineer. His research stimulates the development of constitutive behaviour of materials, understanding of the basic mechanics of large deformation, design for crashworthiness of road and air vehicles, design for safety in defence applications and in design of metal forming processes. Gupta works in the area of large deformations of metals and composites at low, medium and high rates of loading 4d5e7142db

pathways involved in the degradation of toxic aromatic compounds, such as PCBs, dibenzofuran, chlorodibenzofurans, DDT, dyes, and plastics/plasticizers. He focuses particularly on oxidoreductases enzymes due to their unique ability to catalyze challenging reactions, with a special emphasis on understanding their catalytic mechanisms and structural basis for guiding protein engineering... 4d5e7142db

Finite element limit analysis Kumar, Jyant, and Obaidur Rahaman. elements and second-order cone programming. The problem may be formulated in either a kinematic or equilibrium form. "Journal of Engineering Mechanics 140. "Vertical uplift resistance A finite element limit analysis (FELA) uses optimisation techniques to directly compute the upper or lower bound plastic collapse load (or limit load) for a mechanical system rather than time stepping to a collapse load, as might be undertaken with conventional non-linear finite element techniques. 2 (2013): 268-278 4d5e7142db

The technique has been used most significantly in the field of soil mechanics for the determination of collapse loads for geotechnical problems (e.g. slope stability analysis). An alternative technique which may be used to undertake similar direct plastic collapse computations using optimization is Discontinuity layout optimization. 4d5e7142db Ghatak has written over 170 research papers and more than 20 books. His undergraduate textbook on Optics has been translated to Chinese and Persian and his monograph on Inhomogeneous Optical Waveguides (coauthored with Professor Sodha) has been translated to Chinese and Russian. 4d5e7142db

Pravindra Kumar He is known for his work on protein-protein interactions, protein engineering and structure-based drug design. Pravindra Kumar's primary research interest lies in studying Professor Pravindra Kumar is an Indian biophysicist, bioinformatician,

biochemist and Professor & Former Head Department of Biosciences and Bioengineering, Indian Institute Of Technology-Roorkee (IIT-Roorkee) India. Prof. Prof. on protein-protein interactions, protein engineering and structure-based drug design. Pravindra Kumar's primary research interest lies in studying Bacterial enzymes and 4d5e7142db

Electrical engineering is divided into a wide range of different fields, including computer engineering, systems engineering, power engineering, telecommunications, radio-frequency engineering, signal processing, instrumentation, photovoltaic cells, electronics, and optics and photonics. Many of these disciplines overlap with other engineering branches, spanning a huge number of specializations including... 4d5e7142db

Ajoy Ghatak His undergraduate Ajoy Kumar Ghatak is an Indian physicist and author of physics textbooks. Ajoy Kumar Ghatak is an Indian physicist and author of physics textbooks. Ghatak has written over 170 research papers and more than 20 books 4d5e7142db

Electrical engineering Wiley. D. Unsaturated Soil Mechanics in Engineering Practice. ISBN 978-0-471-97489-5. ISBN 978-1-118-28050-8 Electrical engineering is an engineering discipline concerned with the study, design, and application of equipment, devices, and systems that use electricity, electronics, and electromagnetism. ; Rahardjo, H. G. Fredlund, D. It emerged as an identifiable occupation in the latter half of the 19th century after the commercialization of the electric telegraph, the telephone, and electrical power generation, distribution, and use. ; Fredlund, M.
