List of academic databases and search engines possible in the list: Academic publishing Google Scholar List of digital library projects List of educational video websites List of neuroscience databases This page contains a representative list of major databases and search engines useful in an academic setting for finding and accessing articles in academic journals, institutional repositories, archives, or other collections of scientific and other articles. As the distinction between a database and a search engine is unclear for these complex document retrieval systems, see: 12a01cdee9

Bridge Retrieved 4 January A bridge is a structure built to span a physical obstacle (such as a body of water, valley, road, or railway) without blocking the path underneath. asce. It is constructed for the purpose of providing passage over the obstacle, which is usually something that is otherwise difficult or impossible to cross. Pubs. "Lessons from Roman Cement and Concrete". There are many different designs of bridges, each serving a particular purpose and applicable to different situations. Retrieved 4 January 2012. Designs of bridges vary depending on factors such as the function of the bridge, the nature of the terrain where the bridge is constructed and anchored, the material used to make it, and the funds available to build it. Sustainable transport Greenhouse gas emissions from transport are increasing at a faster rate than any other energy using sector. Components for evaluating sustainability include the particular vehicles used; the source of energy; and the infrastructure used to accommodate the transport (streets and roads, railways, airways, waterways and canals). Transportation sustainability is largely being measured by transportation system effectiveness and efficiency as well as the environmental and climate impacts of the system. Transport systems have significant impacts on the environment. Road transport is also a major contributor to local air pollution and. In 2018, it contributed to around 20% of global CO2 emissions. Infrastructure Systems, 11: 31-50, doi:10. 1061/(ASCE)1076-0342(2005)11:1(31), archived (PDF) from the
