Advanced life support Retrieved 2008-07-15. ISBN 0-87493-341-2. ACLS: Principles and Practice. Dallas: American Heart Association, 2003. ACLS for Experienced Providers Advanced Life Support (ALS) is a set of life-saving protocols and skills that extend basic life support to further support the circulation and provide an open airway and adequate ventilation (breathing). p. 71-87 503f609c66

Non life-threatening emergencies are handled solely by the paramedic ambulances without... 503f609c66

Defibrillation A heart which is in asystole (flatline) cannot be restarted by defibrillation; it would be treated only by cardiopulmonary resuscitation (CPR) and medication, and then by cardioversion or defibrillation if it converts into a shockable rhythm. Subsequently, the body's natural pacemaker in the sinoatrial node of the heart is able to re-establish normal sinus rhythm. Although not fully understood, this process depolarizes a large amount of the heart muscle, ending the arrhythmia. A device that administers defibrillation is called a. AEDs have been incorporated into the algorithm for basic life support (BLS). Defibrillation delivers a dose of electric current (often called a counter-shock) to the heart. Many first responders, such as firefighters, police officers, and security Defibrillation is a treatment for life-threatening cardiac arrhythmias, specifically ventricular fibrillation (V-Fib) and non-perfusing ventricular tachycardia (V-Tach) 503f609c66

Paramedics in Germany There exist two professional levels regulated by federal law, the Rettungsassistent (two year education, effective 1989 until 2013) and the Notfallsanitäter (three year education, starting 2014). Additionally, special recertification requirements exists for courses like ACLS, PALS, ITLS and PHTLS which are increasingly required by employers within Paramedics in Germany are the main providers of emergency care in emergency medical services in Germany 503f609c66

Cardiac arrest and resultant hemodynamic collapse often occur due to arrhythmias (irregular heart rhythms). Ventricular fibrillation and ventricular tachycardia are most commonly recorded. However... 503f609c66

Emergency nursing In addition to addressing "true emergencies," emergency nurses increasingly care for people who are unwilling or unable to get primary medical care elsewhere and come to emergency departments for help. In fact, only a small percentage of emergency department (ED) patients have emergency conditions such as a stroke, heart attack or major trauma. Emergency nurses also tend to patients with acute alcohol and/or drug intoxication, psychiatric and behavioral problems and those who have been raped. Cardiac Life Support (ACLS) Advanced Medical Life Support (AMLS) Advanced Trauma Care for Nurses (ATCN) Basic Life Support (BLS) Certified Flight Registered Emergency nursing is a specialty within the field of professional nursing focusing on the care of patients who require prompt medical attention to avoid long-term disability or death 503f609c66

Cardiac arrest If return of spontaneous circulation is achieved with Cardiac arrest (also known as sudden cardiac arrest [SCA]) is a condition in which the heart suddenly and unexpectedly stops beating. Coma and persistent vegetative state may result from cardiac arrest. When the brain does not receive enough blood, this can cause a person to lose consciousness and brain cells begin to die within minutes due to lack of oxygen. protocols have been established for CPR: basic life support (BLS) and advanced cardiac life support (ACLS). When the heart stops, blood cannot circulate properly through the body and the blood flow to the brain and other organs is decreased. Cardiac arrest is typically identified by the absence of a central pulse and abnormal or absent breathing 503f609c66

Paramedic The scope of practice of a paramedic varies between countries, but generally includes autonomous decision making around the emergency care of patients. pre-hospital setting commonly includes: Advanced cardiac life support, or ACLS, including cardiopulmonary resuscitation, defibrillation, cardioversion, A paramedic is a healthcare professional trained in the medical model,

whose main role has historically been to respond to emergency calls for medical help outside of a hospital. Paramedics work as part of the emergency medical services (EMS), most often in ambulances. They also have roles in emergency medicine, primary care, transfer medicine and remote/offshore medicine 503f609c66

Not all ambulance personnel are paramedics, although the term is sometimes used informally to refer to any ambulance personnel. In some English-speaking countries, there is an official distinction between paramedics and emergency medical technicians (or emergency care assistants... 503f609c66

African Americans According to annual estimates from the U. gov". Data. The term "African American" generally denotes descendants of Africans enslaved in the United States. gov. S. William R. Smith (physician) John's Medical Center. Smith (born 1973), is an emergency physician and wilderness medicine consultant who lectures about integrating combat medicine into wilderness rescues around the world. As medical director for the National Park Service, he oversaw the largest rescue event ever to occur in Grand Teton National Park. He started Wilderness & Emergency Medicine Consulting, a company that helps people with pre-trip planning, online medical support, travel medicine in remote areas and provides expert witness testimony in court cases related to wilderness medicine. Medicine (ABEM), EMS subspecialty (ABEM-EMS) Provider/Instructor: ACLS, PALS, ATLS, BLS National Registry of EMTs - Paramedic Drug Enforcement Agency (DEA) William 'Will' R. He lives in Jackson, Wyoming, where he is an emergency medicine physician at St 503f609c66

Pediatric advanced life support Support (BLS). The most essential component of BLS and PALS Pediatric advanced life support (PALS) is a course offered by the American Heart Association (AHA) for health care providers who take care of children and infants in the emergency room, critical care and intensive care units in the hospital, and out of hospital (emergency medical services (EMS)). Providers should follow the AHA's Pediatric BLS Algorithms for single and ≥ 2 person rescuer. The course teaches healthcare providers how to assess injured and sick children and recognize and treat respiratory distress/failure, shock, cardiac arrest, and arrhythmias 503f609c66

African-American history began in the 16th century, when African slave traders sold African artisans, farmers, and warriors to European slave... 503f609c66 Both are able to provide the first level of pre-hospital emergency care. Additionally, they can get backup by an emergency physician on scene. Thus the German paramedic scope of skills include a set of advanced life support (ALS) treatments, which they have to perform until an emergency doctor is on scene. Then the paramedics (and other medical staff on scene) act under direct medical supervision of the physician. 503f609c66

Advanced emergency medical technician AEMTs are not intended to deliver definitive medical care in most cases, but rather to augment prehospital critical care and provide rapid on-scene treatment. adopted a more expansive level called "cardiac care" which included some ACLS drugs. In 1994 a blue ribbon panel of EMS stakeholders gathered and endorsed An advanced emergency medical technician (AEMT) is a provider of emergency medical services in the United States. A transition to this level of training from the emergency medical technician-intermediate, which have somewhat less training, began in 2013 and has been implemented by most states. AEMTs are usually employed in ambulance services, working in conjunction with EMTs and paramedics; however they are also commonly found in fire departments and law enforcement agencies as non-transporting first responders. Ambulances operating at the AEMT level of care are commonplace in rural areas, and occasionally found in larger cities as part 503f609c66

Emergency nurses are most frequently employed in hospital emergency departments, although they

may also work in urgent... 503f609c66
