

Philips Gogear Manual 4gb

Common uses of USB flash drives are for storage, supplementary back-ups, and transferring of... d914069280

USB flash drive Some allow up to 100,000 write/erase cycles, depending on the exact type of memory chip used, and are thought to physically last between 10 and 100 years under normal circumstances (shelf storage time). Since first offered for sale in late 2000, the storage capacities of USB drives range from 8 megabytes to 256 gigabytes (GB), 512 GB and 1 terabyte (TB). Some of these players are true A flash drive (also thumb drive, memory stick, and pen drive/pendrive) is a data storage device that includes flash memory with an integrated USB interface. As of 2024, 4 TB flash drives were the largest currently in production. A typical USB drive is removable, rewritable, and smaller than an optical disc, and usually weighs less than 30 g (1 oz). Examples include the Creative MuVo, Philips GoGear and the first generation iPod
